Executive Chairman's Statement
For the year ended 31 December 2023

Dear Shareholder,

Below are Great Western Mining Corporation PLC's audited report and financial statements for the year ended 31 December 2023.

Great Western Mining Corporation PLC ('Great Western' or the 'Company') explores for, appraises and develops mineral resources on its claims in Nevada, USA but currently has no revenues from its operations. Accordingly, it is reporting a loss after tax of €952,654 for the year (2022: €792,263). At the year end the Company's net assets were €8,831,416 (2022: €8,618,024).

The highlight of Great Western's exploration activity in 2023 was the establishment through intensive fieldwork of a copper porphyry in the Huntoon Valley, where Great Western holds 760 claims. A granite outcrop associated with a porphyry, previously and erroneously shown as tertiary cover on official government maps, was identified and 2 km² (490 acres) of ground was sampled in the immediate vicinity, resulting in consistent, strong copper readings. An expert consultant on porphyry systems was invited to the site in October and spent a week in the field reviewing the porphyry potential, subsequently confirming it in a formal report which the Company has published. This is a really significant development for Great Western and raises the possibility, not yet proven, of connectivity, across the Huntoon Valley, with both the M2 claims to the northeast where the Company has already established a copper resource and the M4 prospects to the east, where the Company's limited drilling activity has established very promising copper anomalies. These three main prospect areas, West Huntoon, M2 and M4 have now been internally grouped together and categorised as the Huntoon Copper Project. An expired agreement with Crowne Point Resources, owner of land equivalent to six federal claims around the historic Huntoon Gold Mine, has been novated since the year end and this land will provide surface and road access for early drilling. Since the end of the year, the Company has conducted a geophysical survey to track and measure the continuation of the porphyry system under tertiary cover, where data cannot be obtained through grab and soil sampling, initially yielding positive results.

During the 2023 field season, Great Western had two geologists working full time in the field, sampling and mapping a number of prospects, under the direction of the Company's Exploration Manager, Dr James Blight. The sampling carried out around the granite extrusion at West Huntoon also identified unrelated epithermal gold and silver in the same area, including a bonanza silver result. In addition to the West Huntoon area, the team also worked extensively on the M5 prospect in the JS group of claims and on the Rhyolite Dome prospect at the Olympic Gold Project, both of which look highly prospective for precious metals.

In April 2024 Great Western exercised its option to purchase the Olympic Gold project and made the final option final payment. There is little doubt that taking an option on Olympic was a good decision in 2020 and the claims are an excellent, complementary add-on to the Company's other claim areas, 50 miles away on the other side of Mineral County. The OMCO Mine produced gold at high grades in the early part of the last century and Great Western has already discovered an extension to the OMCO vein. Good intercepts have already been encountered through drilling at the Trafalgar Hill prospect in the east of this 800 acre project area and Rhyolite Dome to the south of the project is potentially large, interesting and has never been drilled. Large quantities of pre-mined material at Olympic Gold is of higher quality and is more accessible than the spoil heaps at the Company's Mineral Jackpot claims, so will enhance the viability of the Company's milling joint venture.

Shareholders are urged to read the more detailed Operations section of this report which provides more information on all the exploration activity.

Executive Chairman's Statement (continued)
For the year ended 31 December 2023

During the year the Company completed its earn-in as a 50% participant in Western Milling LLC, a joint venture with Muletown, an established contractor in the Company's area of operations. Western Milling started the construction of a process mill to produce precious metal concentrates from pre-mined material and shallow ore with construction completed after the year-end. Production from this mill will mark the Company's first revenues and move it away from pure exploration, but commissioning of the plant and start-up of production are now dependent on final environmental consent from the State of Nevada. The project has been designed and developed meticulously in line with the regulator's own guidelines and recommendations, initially for gravity processing for which approval is being sought but at a second stage for leaching operations which will require separate approval. The State of Nevada encourages industrial development in its rural areas but due to administrative delays caused by staff shortages in the relevant state department, the Company cannot yet give any firm assurances on the timing of the permit being granted.

Great Western has a lot of work ongoing relative to its small size and, although progress may sometimes seem slow with frustrating delays, in the general life cycle of mining operations a great deal has been achieved since the current management took over in late 2019. Few exploration companies of Great Western's size have created and constructed such an advanced commercial project as Western Milling LLC, in a time span of less than 18 months since first heads of terms were signed. There are multiple precious metals prospects on the Company's ground which could supply material to the process mill in the future. Most significantly, the prospect of a major, commercial copper porphyry on the Company's claims offers the sort of upside that should be highly interesting to an investor in mineral resources and provide long term value for shareholders.

Looking ahead to the remainder of 2024, we expect to begin commercial production during the year even though precise timing is out of our hands. We will continue to work on the Huntoon Copper Project this summer while actively seeking a larger and better-funded industry partner to help take it to the next stage, confirming that discussions are ongoing with several interested parties.

The AGM will be held in Dublin on 5 June with a telephone facility to allow shareholders to listen to the proceedings remotely.

I would like to thank our investors for their patience and continuing support and our small technical team for their professionalism, dedication, hard work and positive results.

Yours sincerely,

Brian Hall
Executive Chairman

Date: 8 May 2024

Operations Report**For the year ended 31 December 2023****Principal activities, strategy and business model**

The principal activity of Great Western is to explore for and develop gold, silver, copper and other minerals, with the aim of increasing shareholder value by the systematic evaluation and exploitation of its existing assets in Mineral County, Nevada, USA. Great Western's strategy is:

- Exploration for gold and silver on existing licensed claims to establish resources for commercial exploitation.
- Exploitation of previously mined material containing residual gold and silver to generate revenue.
- Expanding the search for precious metals into new areas.
- Developing copper potential based on an existing indicated and inferred resource.

During the year ended 31 December 2023, Great Western held interests in seven claim groups are categorised into the following projects:

Claim Group	Ownership	Projects	Target mineral
1 Black Mountain Group	100%	Mineral Jackpot M2 (HCP)	Silver, Gold Copper
2 Huntoon	100%	West Huntoon (HCP) M4 (HCP)	Copper, Gold Copper, Gold
3 Jack Springs	100%	M5	Gold, Silver, Copper
4 Rock House	100%	Rock House	Gold, Silver, Copper
5 Eastside Mine	100%	Eastside Mine	Copper
6 TUN	100%	TUN	Gold, Silver
7 Olympic Gold	100% (following exercise of option to purchase)	OMCO Mine Trafalgar Hill West Ridge Rhyolite Dome	Gold Gold Gold Gold

As part of an annual claim renewal procedure, the Group renewed all its claims with effect from 1 September 2023 and subsequently staked 19 additional claims prior to the year-end. The land position held by Great Western in Mineral County currently consists of 760 full and fractional unpatented claims, covering an area of approximately 61 km².

In addition to exploration activities, Great Western has created Western Milling LLC, a 50-50 joint venture with a local contractor, to construct a mill at Sodaville, Nevada, which will process historical mine waste into precious metal concentrates, including tailings spoil heaps and stockpiles from Great Western's claims.

EXPLORATION – Precious Metals Projects***Olympic Gold Project***

In 2020, the Company acquired an option to purchase the Olympic Gold Project, a group of 48 claims located approximately 50 miles from Great Western's other concessions and still within Mineral County. In April 2024 Great Western exercised its option to purchase Olympic Gold and made the final option payment of the total consideration of \$150,000. Work is in progress on several potential prospects at this 800-acre site.

The Olympic Gold Project lies on the northern flanks of the Cedar Mountain Range, on the eastern edge of Mineral County, within the Walker Lane Fault Belt at the intersection of two major mineral trends – the Rawhide-Paradise Peak trend and the Aurora-Round Mountain Trend. The mineral deposit style at Olympic is low-sulphidation epithermal banded quartz-gold vein. Production of gold from the Olympic Mine in the interwar period of 1918 to 1939 totalled approximately 35,000 tonnes at a grade of 25 grams/ton gold and 30 grams/ton silver. Based on a review of the historical data, Great Western believes that faulted offsets of the high-grade Olympic Vein remain to be discovered and this forms one of the numerous target zones on the prospect.

Operations Report (continued)
For the year ended 31 December 2023

During 2023 a single core hole was drilled as a twin of the successful 2022-hole OMRC015, to investigate the mineralised intercept in detail. This hole provided the first core at Olympic and penetrated the mineralised horizon, but did not improve on the previous intercept. The zone where mineralisation was expected was highly brecciated and susceptible to being lost to the core drilling fluids. The unmined portion of the OMCO vein, as intercepted in OMRC015, remains open along the edge of the workings.

Considerable interpretive work has been undertaken for a better understanding of the chemostratigraphy at Olympic and to identify possible vectors towards mineralisation in the existing drill data. This resulting predictive model indicates best potential for gold southeast from the OMCO mine site, east of the major OMCO fault.

Grab sampling, soil sampling and mapping were carried out at the as yet undrilled *Rhyolite Dome* prospect in the south of the claims group. A total of 147 new soil samples were taken in a series of northeast trending traverses, resulting in a positive anomaly for gold (45 samples >10 ppb Au, 7 > 20 ppb Au and 3 > 50 ppb Au), silver and a suite of associated elements, covering around 50 acres on the northwest side of the dome structure. The results will assist in the planning of an induced polarisation (IP) survey and drill targeting at Rhyolite Dome.

Black Mountain

The Black Mountain Group (“BM”) lies on a southwest trending spur ridge of the Excelsior Range of mountains and comprises 249 full and fractional claims covering 20.7km². The BM group contains both Great Western’s copper resource at M2 (see *Copper Projects* below) and the Mineral Jackpot prospect, where outcropping veins, vein workings and spoil heaps contain high-grade gold and silver. Although the five historic mines making up Mineral Jackpot produced gold and silver around the turn of the 19th-20th century, access had only been by mule track and until 2022 none of the prospects had ever been drilled. Great Western has carried out soil surveys over the last three years, collected rock chip samples and conducted magnetometry surveys. Following a successful intercept in MJRC004, the final hole of 2022, a single follow up hole was drilled in 2023, aimed at again intersecting the near-surface mineralised zone. The zone was identified in chips at the expected position, via alteration and in anomalous assay results, but grades were subeconomic, highlighting the variability of these vein zones over relatively short distances along strike. Further planned drillholes were postponed due to technical issues with the rig. The next stage of exploration at Mineral Jackpot is being evaluated.

Rock House

The M7 gold-silver prospect lies within the Rock House (RH) group of claims. This area is accessible and lends itself to mining operations but has never been mined in the past, its potential having only recently been identified through the interpretation of satellite imagery. It is an approximately circular structure of around 450 acres associated with a magnetic low, and is an opening of older rock surrounded by younger volcanic cover. It is also adjacent to the prolifically mineralised Golconda thrust fault and 5 km west along strike from the historically significant Candelaria silver mining district. The area is characterised by intense argillic and sericite alteration, along with silicification and oxidation, within basement siltstones and slates. Unlike many of Great Western’s other prospects, the RH targets were virgin territory until drilled by the Company in 2021. While past workings represent an important guide for exploration, a lack of any previous workings does not rule out mineralisation and any discovery made in such ground will have the benefit of being entirely intact as its highest-grade and nearest-surface portions will not have been removed by previous mining operations.

Rock House was soil sampled in 2023 to test the value of higher resolution surveys around peaks in the previous reconnaissance grid in the north of the area. This work was successful, with a majority of samples matching or exceeding the previous best values obtained for gold. A follow-up broad resampling plan halved the grid spacing of soils at Rock House Northern Shear Zone. This work was underway but incomplete at the end of the year and all samples will be sent to the lab as one batch once the resampling is completed during the 2024 work season.

Complex folding was observed at surface in the Southern Alteration Zone. A 3D geological model that takes the effect of folding into account is being developed. For information on the potential for copper at Rock House, see *Copper Projects* below.

Operations Report (continued)
For the year ended 31 December 2023

Huntoon

After staking an additional 19 claims during the year, Great Western holds a total of 126 full and 12 fractional claims which surround the workings of the historic underground Huntoon gold mine and are prospective for gold, silver and copper mineralisation. The claims are located on the northwest side of the Huntoon Valley, covering approximately 10km². The main focus for GWM at this claim group is copper, and this is covered below under *Copper Projects*. Huntoon does, however, contain some high-grade, potentially epithermal, precious metal veins, which were the target of the old Huntoon mine workings. In 2023 grabs selectively sampled for their apparent copper mineralisation, or because they contained quartz veins, yielded gold grades of 7.29 g/t, 5.53 g/t and 4.51 g/t Au, and bonanza silver grades of 2,438 g/t, 843 g/t, 108 g/t and 102 g/t Ag.

Jack Springs (“JS”)

The **M5** gold prospect lies within the JS Group in altered siliceous host rock surrounded by Tertiary volcanoclastics. Gold, arsenic and antimony were all anomalous in initial reconnaissance samples taken along a northeasterly crest of the central ridge at M5 during the first years of the Company’s operations in the area. Since that time, due to other priorities M5 has not been further explored and remains undrilled.

During 2023 Great Western returned to the M5 prospect and conducted full follow up soil sampling. A total of 335 soil samples were taken in two phases, with 188 samples > 10 ppb Au, 49 samples > 30 ppb, and 20 samples > 50 ppb. The peak value detected in this sampling was 395 ppb or 0.395 g/t Au. A zone 1500 m long by 400 m wide was identified, which contains several corridors of anomalous gold, open as they reach the edge of surrounding overlying tertiary lavas. Two disconnected areas of sampling, taken over small ‘windows’ through the tertiary cover, are also broadly anomalous, suggesting a more widespread sub-cropping zone.

A total of 19 new selective grab samples were taken at M5 during soil sampling. These were taken from outcrops that were mineralised in appearance or otherwise of interest to the sampling geologist. Two stand-out samples, taken from a small working which features a copper oxide bearing quartz vein, returned 5.14 g/t Au, 1,246 g/t Ag (0.125 % Ag) and 0.32% Cu, and 0.291 g/t Au, 534 g/t Ag, and 0.105% Cu respectively. These grabs also represents a significant increase in maximum silver results from M5, the previous most silver-rich samples being 24 g/t and 18 g/t in grab samples from the crest of the hill taken prior to 2023. A sample taken from a small pit on the southeastern flank of the M5 hill returned a grade of 1.247 g/t Au. Two other samples with notably high-grade copper (5.16 % and 1.09 % Cu) occurred on the southeast facing flank of the ridge line. These samples feature sulphide stringers with chalcopyrite and abundant copper oxides.

The selected high-grade samples described above indicate that several discrete strongly mineralised structures reach the surface at M5 and are a likely source of the soil anomalies.

The **M4** Copper-Gold project also lies within the JS Group and is covered under *Copper Projects* below.

Tun

The M6 gold-silver prospect lies within the Tun Group. The M6 prospect is a parallel system of multiple, oxide and sulphide, gold-silver veins and veinlet stockworks. Supergene, high-grade ores have been mined in the past at M6 and the potential remains for deposits of shallow, oxidised stockworks in the immediate vicinity of the historic workings. An initial reconnaissance soil traverse was undertaken at Tun group early in the year, 32 samples being taken in a single traverse, with some positive results (14 samples >10 ppb Au, 2 samples >50 ppb Au). This work was an orientation survey to help identify optimal sample spacing for a more thorough future programme.

EXPLORATION – Copper Projects

Great Western has an exciting and extensive copper portfolio. During the year, the proximity of and possible connectivity between (1) the existing M2 resource, (2) the M4 prospect which has already been successfully drilled and (3) the West Huntoon area led to a re-categorisation of the three projects into a single area of interest, hereinafter described as the Huntoon Copper Project (HCP).

Operations Report (continued)
For the year ended 31 December 2023

The Huntoon Copper Project

At **M2** in the Black Mountains Group, Great Western has discovered and drilled a partly inferred, partly indicated copper resource of 4.3 million tonnes at a grade of 0.45% Cu in a skarn setting. This was a considerable achievement, with the potential to lead to the discovery of a much larger copper resource. Great Western believes that there is untested potential in both directions along strike, on a structure of up to 5 km, supported by historical mine workings to the northeast and an IP anomaly to the southwest.

The **M4** copper target, in the JS group, approximately 4 km from the M2 resource, was identified through geophysical surveys, soil sampling and mapping of mineralised structures at surface. The Company has previously identified copper in drill intercepts at M4 (21.18 m at 0.35% Cu starting at 106.22 m in hole M2_005, including 5.64 m at 0.48% Cu and 0.105 grams/ton Au starting at 106.22 m). Great Western believes that the breccia zone intercepted in hole M4_05, along with other such structures mapped at surface, could be offshoot structures in the roof of a buried orebody. Porphyry systems often feature breccia pipes in the upper reaches in 2019 the Group received a drill permit to follow up on the exciting discovery in hole M4_05. The abundance of highly prospective targets in the Company's portfolio, combined with rig availability issues, led to drilling on the JS projects being deferred in recent years. During 2023 the soil grid east of M4 was extended further to the east with the aim of filling a gap where the existing soil anomalies are open and surface showings of copper are present. This work was ongoing at the end of the field season, and samples will be sent to a lab in 2024, once the planned grid is complete.

At **West Huntoon**, situated 7 km west of M4, and 10 km southwest of M2, there is a copper prospect on which the Company has previously drilled a single hole, assaying at 0.35% Cu over 27.4 metres, amongst other grading intercepts. West Huntoon also contains a sizeable copper anomaly in soils, part of which is coincident with a clear magnetic signature identified on drone magnetometry conducted in early 2022. Post mineralisation tertiary lavas obscure both the geochemical anomaly and the southwestern continuation of the linear anomaly associated with the shear zone. Significant field work at West Huntoon during 2023 included mapping, soil sampling and, towards the end of the field season, a field visit by Dr Lawrence Carter, an independent porphyry expert. A significant development occurred at the conclusion of the season's programme with the identification of several granite exposures not recorded on the US Geological Survey's official map of the area. These granites contain textures typically associated with porphyry-linked intrusions, including varying degrees of mineralisation and alteration. 135 new soil samples were taken which established a copper anomaly (>75 ppm Cu) of 2 km² surrounding the granite outcrop, with strong outlier samples (11 samples >300 ppm, 5 samples > 400 ppm, maximum value 528 ppm Cu) at several locations.

In 2024 a novated Huntoon Mine Cooperation Agreement has been signed with the owner of six patented claims at the core of the West Huntoon area. This agreement provides GWM with near-term drill access, excellent road infrastructure and a local water supply located in one of the most prospective parts of the wider claim group.

Other copper projects

The M8 copper prospect lies within the **Eastside Mine** (EM) claim group, named for the historic Eastside Mine where high-grade copper-oxide ore was mined from shallow underground workings during the First World War. Conoco investigated Eastside as a copper porphyry prospect in the early 1970s, identifying mineralisation consisting of substantial copper and molybdenum values, within a northeast trending graben structure. Drilling by Conoco at the southern end of this structure identified thick successions of alteration together with copper enrichment, but the results were not followed up. The Company regards the northerly continuation of this structure as a strong, untested target for buried copper mineralisation. During 2021 an IP survey was performed at EM Group and the results were highly encouraging. The key findings of this work were fault zones accompanied by high resistivity and chargeability features, correlating with observed surface stockwork veining, silicification, copper mineralisation and copper soil halos. Although no significant activities took place at the Eastside mine during 2023, there are drill-ready targets.

Following the identification of anomalous copper in the final 2022 hole at **Rock House**, copper oxide has been identified in surface grabs during soil sampling in the Northern Shear Zone.

Operations Report (continued)
For the year ended 31 December 2023

While **Tun** has in the past been primarily a gold target, initial orientation soil samples taken there early in the year showed copper anomalism. Over 32 samples, 15 were >75 ppm Cu, 12 > 100 ppm Cu and 5 > 150 ppm Cu, with a peak value of 204 ppm Cu.

Seeking Copper JV partner

A major copper project remains too large an undertaking for a company of Great Western's size and so a larger industry partner is currently being sought, particularly in light of the potentially transformative porphyry evidence found during the year.

Reclamation work

Reclamation work undertaken at OMCO has been signed off by the Bureau of Land Management and a new permit issued for planned follow-up drilling and ground disturbance relating to removing mine waste for processing at the Company's milling joint venture.

Summary of 2023 Work Programme

- Discovery of granite at the core of the West Huntton 2 km² copper anomaly shows porphyry potential and new soil results strengthen continuity of the anomaly. New grab results highlight overlapping precious metal potential.
- A total of 335 new soil samples at M5 establishes a large gold-silver-copper anomaly, previously suspected but never properly tested at scale.
- New soil results at Rhyolite Dome in the Olympic Gold Project are some of the best results for the entire claim group, including the area of the old OMCO mine, and indicate the prospectivity of this target.
- Drilling at Mineral Jackpot and Olympic confirms locations of mineralised horizons previously intercepted.
- Permit granted for removal of first material from Olympic for processing by the milling joint venture.
- New encouraging soil results at Tun.
- At the end of the year additional soil sampling was underway at both JS-NE (east of M4) and Rock House. Samples will be submitted to lab once all planned samples have been collected.

PROCESSING OPEATIONS – Joint Venture

Planned Processing Operations

Over the last two years, Great Western has been developing the optimum means of processing mining waste for recovery of gold and silver. Originally this was planned to be a simple gravity separation process for spoil material from Mineral Jackpot, where there are 51 known spoil heaps, but the concept was expanded once work began on the newly acquired Olympic Gold Project in 2021, where extensive tailings, spoil heaps are present and a stockpile of material had been mined but never processed. A 50-50 joint venture known as Western Milling LLC was established with local contractor Muletown Enterprizes to construct a processing mill on land owned by Muletown. Construction of the processing plant was completed in early 2024 and start-up of operations is subject only to final environmental approval from the State of Nevada. Initially material will be processed through a gravity circuit but the plant has been built to meet the specifications required for a chemical leaching project, for which a permit application will be lodged once gravity processing is operational.

In 2022, an independent JORC-compliant resource estimate of Great Western's mine waste material resulted in an Inferred Resource of 31,000 tonnes, grading 1.6 grams/ton Au and 3.0 grams/ton Ag in tailings at Olympic Mine and several Exploration Targets at the OMCO Mine and Mineral Jackpot.

Dr James Blight
Exploration Manager

Date: 8 May 2024

Directors' Biographies

For the year ended 31 December 2023

Brian Hall – Executive Chairman

- Chartered Accountant who became a member of the small team which landed the first commercial oil from the UK North Sea
- Over 40 years managing natural resources companies
- Founded oil company Aminex PLC in 1991, took it to the LSE Premium List and managed its activities in 8 countries, discovering and exploiting oil or gas on three continents
- Aminex is one of very few independent oil companies to have paid a Russia exit dividend
- Joined the Great Western board in 2012, Chairman in 2013 and Executive Chairman in 2019

Robert O'Connell – Operations Director

- Graduate of Texas Christian University
- Trained oil and gas driller
- 20 years' operating experience in oil and mining
- Founder employee of Great Western, staked the original claims and oversaw 5,000 metres of drilling, resulting in an Inferred copper resource of 19,000 tonnes copper
- Fully familiar with all regulatory requirements in Nevada and has built trust and good working relations with both the host state and federal authorities
- Joined the Board of Great Western in 2006

Max Williams – Finance Director and Company Secretary

- Chartered Accountant
- 30 years' experience managing the finances of publicly-traded natural resources companies
- Until 2019 Financial Controller/Secretary and subsequently Finance Director of Aminex PLC, controlling the finances of a group operating in multiple jurisdictions
- Joined the Great Western Board in 2019

Andrew Hay – Senior Non-Executive Director

- Graduate of Oxford University
- Over 30 year banking career in London and New York
- Senior Adviser at Smith Square Partners, leading London corporate finance firm
- Formerly Chairman of LGB Corporate Finance and before that built and led the corporate finance business of Edmond de Rothschild in London
- Experience in debt and equity capital markets and international M&A
- Joined the Great Western Board in 2020 and is Chairman of Audit and Risk Committees

Alastair Ford – Non-Executive Director

- Graduate of Oxford University
- 20-year career as a mining specialist
- Mining journalist on the Investors' Chronicle
- Editor of The Minesite.com
- Formerly, Chief Investment Officer at Mineral & Financial Investments PLC for six years
- Currently a Mining Affairs Consultant for Vox Markets
- Non-Executive Director, Xtract Resources PLC
- Joined the Great Western Board in 2020 and is Chairman of Remuneration Committee

Gemma Cryan – Non-Executive Director

- 20-year experienced mineral exploration geologist
- Experienced in corporate affairs
- First Class Honours degree in Earth Sciences from the National University of Ireland
- Previously Geology Manager, Greatland Gold PLC
- Executive Director, Starvest PLC which supported early-stage mineral exploration ventures
- Non-Executive Director, First Development Resources PLC
- Joined the Great Western Board in 2021

Directors' Report**For the year ended 31 December 2023**

The Directors present their report and audited financial statements for the year ended 31 December 2023 of Great Western Mining Corporation PLC ("the Company") and its subsidiaries ("the Group").

Principal activity, business review and future developments

The Group's principal activity is the exploration for and mining of copper, silver, gold and other minerals in Nevada, U.S.A. During the year, expenditure of €418,066 (2022: €963,765) was incurred on the Group's exploration assets including costs associated with the retention of the claims held by the Group.

The Company is listed on the Euronext Growth Market of Euronext Dublin and the Alternative Investment Market ("AIM") of the London Stock Exchange.

The Directors have reviewed the financial position of the Group as at 31 December 2023 and expect that it will be in a position to continue its planned activities for the foreseeable future.

Results and dividends

The consolidated income statement for the year ended 31 December 2023 and the consolidated statement of financial position as at that date are set out on page 30 and 31 respectively. The loss for the year amounted to €952,654 (2022: €792,263). All exploration and development costs to date have been capitalised.

No dividends were paid during the year (2022: €Nil).

Directors and Secretary and their beneficial interests

The names of the Directors who held office during 2023 together with a short biography on each are set out on page 8. In accordance with the articles of association, Brian Hall and Gemma Cryan retire from the Board by rotation and being eligible, offer themselves for re-election.

The Directors who held office at 31 December 2023 had no beneficial interests in any of the shares of the Company and Group companies other than Ordinary Shares in Great Western Mining Corporation PLC as follows:

Director	Number of ordinary shares		
	8 May 2024	31 Dec 2023	31 Dec 2022
Gemma Cryan	9,090,909	9,090,909	-
Alastair Ford	3,636,363	3,636,363	-
Brian Hall	219,772,729	219,772,729	110,000,000
Andrew Hay	31,881,818	31,881,818	13,700,000
Robert O'Connell	34,170,490	34,170,490	21,670,490
Max Williams	75,227,273	75,227,273	50,000,000

The Group operates a directors' share option scheme and in addition to the interests disclosed above certain directors have options to acquire ordinary shares of €0.0001 each in Great Western Mining Corporation PLC. The Directors who held office at 31 December 2023 had the following beneficial interests in options over the Company's Ordinary shares:

Directors' Report (continued)
For the year ended 31 December 2023

Directors and Secretary and their interests (continued)

Name of Director	Holding at 1 January 2023	Granted during the year	Exercised during the year	Holding at 31 December 2023	Weighted average exercise price
Gemma Cryan	9,000,000	3,000,000	-	12,000,000	€0.00125
Alastair Ford	9,000,000	3,000,000	-	12,000,000	€0.00125
Brian Hall	29,666,667	10,000,000	-	39,666,667	€0.00440
Andrew Hay	9,000,000	3,000,000	-	12,000,000	€0.00125
Robert O'Connell	36,000,000	10,000,000	-	46,000,000	€0.00559
Max Williams	19,000,000	10,000,000	-	29,000,000	€0.00111

For the purposes of Section 305 of the Companies Act 2014 (Ireland), the aggregate gains by Directors on the exercise of share options during the year ended 31 December 2023 was €nil (2022: €nil).

Transactions involving Directors

There have been no contracts or arrangements of significance during the year in which Directors of the Company had an interest other than as disclosed in note 21 to the financial statements.

Share capital

The Company's authorised share capital comprises 9,000,000,000 ordinary shares of €0.0001 each. The Company's ordinary shares rank equally in all respect, carry voting and dividend rights but no special rights. There are no restrictions on the transfer of the ordinary shares or voting rights. At the forthcoming Annual General Meeting, a resolution will be proposed to increase the authorised share capital by 2,000,000,000 ordinary shares of €0.0001 each to 11,000,000,000 ordinary shares of €0.0001 each.

Existing authorities to allot share capital previously granted to the Directors will expire on 1 May 2024. Resolutions will be proposed to renew the Directors' authority to allot share capital and will be set out more fully in the Notice of Annual General Meeting for 2024.

Significant shareholders

As of the date of this report, the following shareholders held 3% or more of the issued ordinary share capital of the Company:

	Number of shares	Per cent
Cantor Fitzgerald Europe*	257,934,748	3.63%
Spreadex Limited*	256,934,748	3.62%
Premier Miton Group PLC	229,885,057	3.24%
Brian Hall	219,772,729	3.01%

* Spreadex Limited's current interest in the Company is held via a contract for difference/spreadbet financial instrument

The Directors are not aware of any other legal or beneficial shareholder with a holding of 3% or more of the share capital of the Company.

Directors' Report (continued)
For the year ended 31 December 2023

Share price

The share price movement in the year ranged from a low of €0.0010/£0.000385 to a high of €0.0020/£0.00135 (2022: €0.0010/£0.00105 to a high of €0.0025/£0.0016). The share price at the year-end was €0.0005/£0.000425 (2022: €0.0010/£0.00125).

Principal risks and uncertainties

The Board regularly reviews the risks to which the Group is exposed and ensures through its meetings and regular reporting that these risks are minimised as far as possible.

Main trends and factors likely to impact future business performance

The Group considers the general commodity cycle to be the key trend and factor that is likely to impact future business performance. The prices of gold, silver and copper weakened during 2023 but have strengthened during the early months of 2024. The Board maintains a longer-term positive outlook for copper and precious metal fundamentals because:

- Global mine supply remains constrained – declining grade and continued project deferrals forecast going forward.
- Further demand growth upside forecast through electric vehicles, renewable energy and infrastructure investment.
- Future base demand will not be met without significant investment and these investments take time to come to market.

The Group considers the risk of climate change and the importance of maintaining a low carbon footprint. At the Group's current stage of development, the Board considers the carbon emissions are low but with plans to develop processing operations the Group will continue to monitor factors which impact the environment as well as investor and public sentiment.

The principal risks and uncertainties facing the Group at this stage in its development and in the foreseeable future are detailed below together with risk mitigation strategies employed by the Board:

Geological risk

Mineral exploration - Mineral exploration is a high-risk activity and there can be no guarantee that the Group will identify a mineral resource that can be extracted economically.

- The Board regularly reviews the exploration and development programmes.
- Activities are focused in Nevada, a jurisdiction that represents relatively low political and operational risk.
- Exploration work is conducted on a systematic basis, using modern geochemical and geophysical techniques and various drilling methods.

Technical risk

Resource risk - All mineral projects have risk associated with defined grade and continuity. Mineral reserves are always subject to uncertainties in the underlying assumptions which include geological projection and price assumptions.

- At the appropriate time, resources and reserves are estimated by independent specialists on behalf of the Group in accordance with accepted industry standards and codes. The Group currently reports resources in accordance with the JORC (2012) code.
- The directors are realistic in the use of metal and mineral price forecasts and impose rigorous practices in the QA/QC programmes that support its independent estimates.

Directors' Report (continued)
For the year ended 31 December 2023

Main trends and factors likely to impact future business performance (continued)

Corporate risk

Recruitment and Retention of Staff - the Group's ability to execute its strategy is dependent on the skills and abilities of its people.

- The Board undertakes initiatives to foster good staff engagement and ensure that remuneration packages are competitive in the market.
- The Group relies on local contractors to provide exploration services. High demand may give to delays in the work programme and increased prices.

Occupational health and safety - the Group's exploration activities are conducted in an extremely remote area of Nevada.

- The Operations Director has been given specific responsibility for health and safety in the field.
- Every employee of the Group is committed to promoting and maintaining a safe working environment.
- The Board regularly reviews occupational health and safety policies and compliance with those policies.

Macroeconomic and geopolitical environment – the Directors monitor global events together with the potential impact on the Group's operations. The severe global challenges during 2023 included the war in Ukraine and the Israel-Gaza war. Global supply constraints caused an increase in inflation rates and interest rates in the areas in which the Group operates. While inflation rates are falling, interest rates remain high. The Board considers that the provision of services and supplies in Nevada, its main area of operation, remain largely unaffected although costs have increased. However the Directors believe the impact on equity markets may give rise to sources of funding being limited or more expensive.

- To enable work on the Group's assets, Great Western contracts local service providers to perform work overseen by the Group's management.
- The Board monitors the availability and suitability of sources of funding to support the operations.

Financial risks

Commodity price risk - The principal commodities that are the focus the Group's exploration and development efforts are subject to highly cyclical patterns in global demand and supply and consequently the price of those commodities is highly volatile.

- The Board consistently reviews commodity prices and trends for its key projects throughout the development cycle.

Foreign exchange - Although the reporting currency is the Euro, which is the functional currency of the Company, the Group incurs expenditure in foreign currencies in the countries in which it operates. The Company holds funds in each currency to reduce risk. The Company may also undertake fundraising activities in local currencies, thus creating foreign currency exposure.

Corporate Governance Statement

The Directors of Great Western Mining Corporation PLC recognise the importance of good corporate governance and have adopted the Quoted Companies Alliance Corporate Governance Code ("QCA Code"). The Board agrees to and endeavours to conform to the ten principles outlined in the QCA Code. In accordance with Section 1373 of the Companies Act 2014, statements by the Directors in relation to the Company's application of corporate governance principles, compliance with the principles of the QCA Code and the Group's system of internal controls are set out on pages 16 to 22.

Directors' Report (continued)
For the year ended 31 December 2023

Remuneration committee

The key policy objectives of the Remuneration Committee in respect of the Company's executive Directors are:

- To ensure that individuals are fairly rewarded for their personal contributions to the Group's overall performance; and
- To act as the committee ensuring that due regard is given to the interest of the Company's shareholders and to the financial and commercial health of the Group.

Directors' remuneration during the year ended 31 December 2023, excluding share-based payments was as follows:

	2023	2022
	€	€
Executive Directors' remuneration		
Brian Hall	86,228	87,950
Robert O'Connell	78,000	78,000
Max Williams	95,425	87,950
Total executive Directors' remuneration	<u>259,653</u>	<u>253,900</u>
Non-executive Director fees		
Gemma Cryan	28,802	29,303
Alastair Ford	13,825	14,066
Andrew Hay	13,825	14,066
Total non-executive Director's fees	<u>56,452</u>	<u>57,435</u>
Total Directors' remuneration	<u>316,105</u>	<u>311,335</u>

In addition to Non-Executive Directors' fees, Alastair Ford and Andrew Hay are each contracted with GWM Operations Limited to provide consulting services for marketing and corporate finance respectively for which each received €14,946 in the period (2022: €15,245).

Shareholders

There is regular dialogue with shareholders and presentations are posted to the Company's website from time to time.

The Board encourages communication with shareholders throughout the year and welcomes their participation at general meetings. Where possible, all Board members attend the annual general meeting and are available to answer questions. Separate resolutions are proposed on substantially different issues and the agenda of business to be conducted at the annual general meeting includes a resolution to receive and consider the annual report and financial statements. The Chairman of each of the Board's committees is available at the annual general meeting.

The Board regards the annual general meeting as an important opportunity for shareholders, Directors and management to meet and exchange views. Notice of the annual general meeting together with the annual report and financial statements is sent to shareholders in accordance with the articles of association of the Company and details of the proxy votes for and against each resolution are announced after the result of the votes.

Directors' Report (continued)
For the year ended 31 December 2023

Internal control

The Directors have overall responsibility for the Group's system of internal controls and the setting of appropriate policies on these controls. The Board regularly assures itself that the system is functioning and is effective in managing business risk. This system includes financial controls which enable the Board to meet its responsibilities for the integrity and accuracy of the Group's accounting records.

The key features of the system of internal controls are the following:

- Budgets are prepared for approval by executive management and inclusion in a Group budget approved by the Board;
- Expenditure and income are regularly compared to previously approved budgets;
- The Board establishes exploration and commodity risk policies as appropriate, for implementation by executive management;
- All commitments for expenditure and payments are compared to previously approved budgets and are subject to approval by personnel designated by the Board or by the Board of subsidiary companies;
- Regular management meetings take place to review financial and operational activities;
- Cash flow forecasting is performed on an ongoing basis to ensure efficient use of cash resources;
- Regular financial results are submitted to and reviewed by the Board; and
- The Directors, through the audit committee, consider the effectiveness of the Group's system of internal financial control on an ongoing basis.

Going concern

The financial statements of the Group and Parent Company are prepared on a going concern basis.

In order to assess the appropriateness of the going concern basis in preparing the financial statements for the year ended 31 December 2023, the Directors have considered a time period of at least twelve months from the date of approval of these financial statements.

The Group incurred an operating loss during the year ended 31 December 2023. At the balance sheet date, the Group had cash and cash equivalents amounting to €0.10 million and the Company raised an additional amount of €0.82 million (before transactions expenses) through a placing completed in March 2024. The future of the Company is dependent on the successful outcome of its exploration activities and implementation of revenue-generating operations. The Directors believe that the Group's ability to make additional capital expenditure on its lode claims in Nevada will be assisted by the generation of first revenues from the reprocessing of historical spoil heaps and tailings. The Directors are seeking a joint venture partner to provide funding to enable the acceleration of the Group's Huntoon Copper Project. The Directors also believe that the Group's cash flow can be further assisted, if necessary, by raising additional capital, the deferral of planned expenditure and other cost saving actions, loan facilities for revenue-generating operations or from future revenues. The Directors have taken into consideration the Company's successful completion of placings in recent years, including placings completed in January and August 2023 and March 2024, to provide additional cash resources.

The Directors concluded that the Group will have sufficient resources to continue as a going concern for the future, that is for a period of not less than 12 months from the date of approval of the consolidated financial statements.

However, there exists a material uncertainty that may cast significant doubt over the ability of the Group to continue as a going concern. The Group may be unable to realise its assets and discharge its liabilities in the normal course of business if it is unable to raise funds for further exploration on and development of its exploration assets. The condensed consolidated statements have been prepared on a going concern basis and do not include any adjustments that would be necessary if this basis were inappropriate.

Directors' Report (continued)
For the year ended 31 December 2023

Political and charitable donations

The Company did not make any political or charitable donations during the year (2022: €Nil).

Post balance sheet events

On 11 March 2024, the Company announced a Placing Agreement for the issue of 1,610,344,827 new Ordinary Shares of €0.0001 each at a price of 0.0435 pence each, raising £700,500 (€819,826) before transaction expenses and completed on 19 March 2024.

On 16 April 2024, the Company exercised an option to acquire the Olympic Gold Project.

There were no other significant post balance sheet events.

Accounting records

The Directors believe that they have complied with the requirements of Sections 281 to 285 of the Companies Act 2014 with regard to the maintenance of adequate accounting records by employing personnel with appropriate expertise and by providing adequate resources to the financial function. The accounting records of the Company are maintained at 41 Ewell Downs Road, Epsom, Surrey, United Kingdom.

Directors' Compliance Statement

The Directors, in accordance with Section 225(2) of the Companies Act 2014, acknowledge that they are responsible for securing the Company's compliance with certain obligations specified in that section arising from the Companies Act 2014, and tax laws ('relevant obligations'). The Directors confirm that:

- A compliance policy statement has been drawn up setting out the Company's policies that in their opinion are appropriate with regard to such compliance;
- Appropriate arrangements and structures have been put in place that, in their opinion, are designed to provide reasonable assurance of compliance in all material respects with those relevant obligations; and
- A review has been conducted, during the financial year, of those arrangements and structures.

Relevant audit information

The Directors believe that they have taken all steps necessary to make themselves aware of any relevant audit information and have established that the Group's statutory auditors are aware of that information. In so far as they are aware, there is no relevant audit information of which the Group's statutory auditors are unaware.

Auditors

The auditors, Azets Audit Services Ireland Limited were appointed by the Directors for the current year and will remain in office in accordance with section 383 of the Companies Act 2014.

For and on behalf of the Board

Brian Hall
Executive Chairman
Date: 8 May 2024

Max Williams
Finance Director

Corporate Governance
For the year ended 31 December 2023

The Directors of Great Western Mining Corporation PLC recognise the importance of good corporate governance and have adopted the Quoted Companies Alliance Corporate Governance Code (“QCA Code”). The Board agrees to and endeavours to conform to the ten principles outlined in the QCA Code.

The Board has reviewed the principles and concluded that Great Western has complied with the QCA Code during the course of the year except in relation to the following matters:

- A performance evaluation of the Board, its Committees and its Directors was not undertaken during the year following the expansion of the Board and new members of the Committees being appointed. The Board recognises that a formal evaluation process is required and expects to implement a formal procedure within the current year.
- Great Western does not have at least two independent non-executive directors. The Company has granted options over the ordinary shares to each of the Non-Executive Directors. The Board considers that the grant of options in conjunction with the Non-Executive Directors’ fees paid enable the Company to attract suitable candidates to the Board as the Company seeks to grow. As detailed in Note 21 to the financial statements, Mr Ford and Mr Hay receive consulting fees for other services provided. Other than the grant of options and consulting fees, the Board considers the three Non-Executive Directors are free from any business relationships or circumstances that could materially affect their independent judgement.
- Mr Hall continues to hold the combined role of Executive Chairman as the Company has not appointed a Chief Executive Officer. While the Board supports the segregation of duties between the roles of Chairman and Chief Executive Officer, the Board currently believes the dual role provides more benefit to the Company during a period of growth, including the preservation of cash for exploration expenditure, and has accordingly strengthened the non-executive representation on the Board.

Details of how the Company addresses the ten governance principles defined in the QCA Code are set out below and are found on the Company’s website in accordance with AIM Rule 26.

1. Establish a strategy and business model which promote long-term value for shareholders

Great Western is a natural resource company with the following strategy:

- Exploration for gold and silver on existing licensed acreage to establish a resource with a view to commercial exploitation.
- Exploitation of previously mined material to achieve early gold and silver sales.
- Expanding the search for precious metals into new areas.
- Developing substantial copper potential with a larger industry partner.

Great Western is focused on its seven claim groups which offer the potential for exploiting (1) short term gold and silver deposits, including the potential to reprocess spoil heaps and tailings from historical mining operations, and (2) long-term, world-class copper deposits in Mineral County, Nevada. Following the exercise of the option to purchase Olympic Gold, all of the properties are in Mineral County and are 100% owned and operated. All claim groups are hosted by the regional Walker Lane Structural Belt, the largest structural and metallogenic belt in Nevada, yet one of the least explored in recent times.

The strategy is designed to promote long-term value for shareholders by enabling the Company to generate revenues from the exploitation of previously mined material and either to attract industry partners or otherwise raise finance to commercialise projects or to enable the crystallisation of value in the assets through farm-out or outright sale.

Corporate Governance (continued)
For the year ended 31 December 2023

The Board seeks to reduce shareholder risk through operating in regions which are stable and provide a commercially attractive environment. The Company has operated in Nevada for over 20 years.

The Board implements the strategy using its in-house technical expertise and operational experience assisted by the local communities, suppliers and service providers in Nevada. The Board updates shareholders regularly on operations and reports on its strategy and the mitigation of challenges in its Annual Report and Half-Yearly Report.

2. Seek to understand and meet shareholders needs and expectations

The Board recognises that it is accountable to shareholders for the implementation of the Company's strategy, performance and activities and is committed to providing effective communication with shareholders.

The Company's Executive Chairman, Brian Hall, is responsible for shareholder communications. Any shareholder questions may be emailed for the attention of the Company using the form on the Company's website at: www.greatwesternmining.com/contact. The Annual General Meeting is considered a significant forum for dialogue with its shareholders. All Directors expect to attend the Annual General Meeting in person or by dial-in link. The Board supports measures to disseminate published news through social media, to provide additional opportunities for the Company to present information on activities and to liaise with shareholders outside the Annual General Meeting and informs shareholders of these opportunities as they arise.

The Executive Chairman and Finance Director maintain regular contact with the Company's advisers. Information on shareholder needs and expectations is shared with the Board.

3. Take into account wider stakeholder and social responsibilities and their implications for long-term success

The Company's long-term success relies on good relations with a wide range of stakeholders both internal (employees) and external (suppliers, sub-contractors, regulatory authorities, federal and state governments and local communities).

The Company's staff is a key stakeholder group and the small size of Great Western ensures that Executive Directors and employees are in frequent communication with each other which assists in decision-making and the implementation of tasks.

The Board acknowledges that the Company's activities may have an impact on the environment. The Board recognises that exploration in wilderness areas carries a responsibility and takes very seriously the need to adhere to environmental and conservation legislation. The Board ensures that the Company meets its regulatory and environmental responsibilities and works in accordance with the regulations for maintaining lode claims as set out by the Bureau of Land Management and the US Forest Service. To this end the Company engages an expert environmental and planning company to ensure that actions taken today will not affect shareholder value later. The regulations require the Company to conduct reclamation work for any ground disturbance and such reclamation work is agreed and bonded in conjunction with the permitting of planned operations.

The Board conducts the Company's operations with the support of the local communities including suppliers and contractors with the required skill and experience. The Board also recognises its ethical and legal responsibility to work with indigenous title communities to maintain relationships. The Company ensures that it engages with indigenous title communities and external expert consultants in order to identify and preserve cultural heritage sites.

Corporate Governance (continued)
For the year ended 31 December 2023

4. Embed effective risk management, considering both opportunities and threats, throughout the organisation

Natural resource exploration is inherently high risk and the global market for minerals is cyclical. Each investor should consider the risks associated with an investment in exploration companies but the opportunities may provide potentially significant returns. The Board believes that the Company's range of assets in Nevada provide a material spread of risk enabling exploration for different minerals, primarily gold, silver and copper. The Board undertakes an annual review of the claims to assess the appropriateness of continued exploration on each claim group.

The Board comprises Directors who provide a range of experience in natural resources and capital markets. The Company operates in accordance with its Financial Position and Prospects Procedures to assist with corporate and financial governance.

The Company maintains a risk register that identifies the key corporate, geological, technical and financial risks to which the Company is exposed. The risk register is reviewed and if required updated at each Board meeting. The impact of risks is mitigated by: the recruitment of appropriately qualified and experienced staff to key financial, technical and management positions; consideration of industry risks through the assessment of exploration targets; cash flow management and treasury procedures; and regular management, Committee and Board meetings to review operating and financial activities. Insurance cover is arranged as appropriate.

In conjunction with the preparation and approval of the Annual Report and Half-Yearly Report, the Audit Committee conducts an in-depth review of financial and industry risks.

5. Maintain the Board as a well-functioning, balanced team led by the chair
The Board

The Board is responsible for the supervision and control of the Group and is accountable to the shareholders. The Board has reserved decision-making rights on a variety of matters including determining and monitoring business strategy for the Group; evaluating exploration opportunities and risks; approving all capital expenditure on exploration assets; approving budgets and monitoring performance against budgets; monitoring risks and controls; reviewing and monitoring executive management performance and considering and appointing new Directors and Company Secretary. The Board has approved control procedures that assess and manage risk and ensure robust financial and operational management within the Group. Day-to-day management is devolved to the Executive Directors, seeking approval from the Board on all significant financial and operational matters.

The Board currently comprises three Executive Directors and three Non-Executive Directors. Andrew Hay has been appointed the Senior Non-Executive Director.

In order to attract Non-Executive Directors of sufficient experience and calibre, the Company has awarded options in accordance with the Share Option Plan to each of the Non-Executive Directors. The QCA Code recommends that Non-Executive Directors do not participate in option schemes but the Board considers the combination of Directors' fees and options to be appropriate for a Company of Great Western's size and resources. Two Non-Executive Directors also receive consulting fees for other services as set out in Note 21 to the financial statements.

The Board has agreed to meet at least six times in each calendar year and during the year ended 31 December 2023 met on six occasions. The Board also met on two occasions to approve the issue of New Ordinary shares and met on one further occasion to consider and to approve the grant of options. An agenda and supporting documentation are circulated in advance of each meeting. All the Directors bring independent judgement to bear on issues affecting the Group and all have full and timely access to information necessary to enable them to discharge their duties. The Directors have a wide and varying array of experiences in the extractive industries.

Corporate Governance (continued)
For the year ended 31 December 2023

Directors' attendance at Board and Committee Meetings

	Board (main)	Audit Committee	Remuneration Committee	Nominations Committee
Number of meetings	6	2	1	1
	Meetings attended	Meeting attended	Meetings Attended	Meetings attended
Gemma Cryan	6	-	1	-
Alastair Ford	6	2	1	1
Brian Hall	6	-	-	1
Andrew Hay	6	2	1	1
Robert O'Connell	6	-	-	-
Max Williams	6	-	-	-

During 2023, Directors who were not Committee members attended meetings of the Committees by invitation and these details have not been included in the summary above.

Executive Chairman

The Board acknowledges that the current appointment of an Executive Chairman, which combines the dual roles of Chairman and Chief Executive Officer, is not in accordance with recommended best practice as set out in the QCA Code. However the Board believes that the appointment of an Executive Chairman is appropriate for the Company at this stage of its development and assists with the preservation of capital for use on exploration activities. The Board considers that the appointment of three Non-Executive Directors with a range of experience and knowledge provides effective balance for the composition of the Board.

Board committees

The Board has implemented a committee structure to assist in the discharge of its responsibilities. All committees have written terms of reference setting out their authority and duties.

Audit committee

The Audit Committee is comprised of two Non-Executive Directors, Andrew Hay (as Chairman of the Committee) and Alastair Ford. The Committee may examine any matters relating to the financial affairs of the Group and the Group's audit. These include reviews of the published financial statements and announcements, internal control procedures, accounting procedures, accounting policies, the appointment, independence, objectivity, terms of reference and fees of external auditors and such other related functions as the Board may require.

The Audit Committee met twice during the year to consider matters relating to the 2022 Annual Report and the 2023 Half-Yearly Report. The Audit Committee reviews the necessity for an internal audit function. Based on the scale of the Group's operations and close involvement of the Board and senior management in setting and monitoring controls, the Audit Committee is satisfied that an internal audit function is not currently required.

Nomination committee

The Nomination Committee, which comprised Brian Hall (Chairman of the Committee) and two Non-Executive Directors, Alastair Ford and Andrew Hay. The Committee meets at least once every year to lead the formal process of rigorous and transparent procedures for Board and Senior Management appointments and to make recommendations to the Board in accordance with best practice and other applicable rules and regulations, insofar as they are appropriate to the Group at this stage in its development.

Corporate Governance (continued)
For the year ended 31 December 2023

Remuneration committee

The Remuneration Committee comprised of two Non-Executive Directors, Alastair Ford (Chairman of the Committee), Andrew Hay and Gemma Cryan during the year. The Committee determines the terms and conditions of employment and annual remuneration of the Executive Directors. It takes into consideration external data and comparative third-party remuneration and has access to professional advice outside the Group. The Remuneration Committee met once during the year.

The key policy objectives of the Remuneration Committee in respect of the Company's Executive Directors are:

- To ensure that individuals are fairly rewarded for their personal contributions to the Group's overall performance; and
- To act as the Committee ensuring that due regard is given to the interest of the Company's shareholders and to the financial and commercial health of the Group.

6. Ensure that between them the Directors have the necessary up-to-date experience, skills and capabilities

The Directors provide a diverse range of skills and experience spanning technical, geological, financial and operational disciplines relevant to the development and management of a natural resources public company and sufficient to enable the successful execution of the Company's strategy. The Board comprises five men and one woman.

Directors keep their skill sets up to date by attendance at, and participation in, various events organised by their respective industry sectors and by participation in continuing professional development courses. The Directors are also advised on relevant regulatory compliance and statutory matters through briefings primarily through the Company's Nominated Adviser and external legal adviser, and all Executive and Non-Executive Directors have access to the Company's external advisers.

The Board engages external geologists, metallurgists, environmental specialists and a number of other specialist consultants to produce the required surveys and reports required by the Company. There is an agreed procedure for Directors to take independent legal advice. The Company Secretary is responsible for ensuring that the Board procedures are followed and all Directors have direct access to the Company Secretary.

The composition of the Board with respect to skills, experience and gender will be kept under review.

7. Evaluate the Board performance based on clear relevant objectives, seeking continuous improvement

The Company does not currently have a formal evaluation procedure for individual Board members and therefore does not comply with the recommendations set out in the QCA Code.

However the performance of the Executive Directors is informally evaluated by the Remuneration Committee. The conclusions are considered when determining changes in the executive remuneration levels but also with reference to the Group's current cash position. The Remuneration Committee thereby grants options in accordance with the Company's Share Option Plan from time to time and where considered warranted. The Board will propose that the Share Option Plan be extended by five years at the forthcoming Annual General Meeting. The Board considers that the corporate governance policies it has currently in place for Board performance reviews is commensurate with the size and development stage of the Company. The Board will develop more comprehensive and appropriate performance evaluations of its Board and to provide for Board succession planning.

8. Promote a corporate culture that is based on ethical values and behaviour

The Board believes in promoting and maintaining high ethical standards to support its strategy and to maximise shareholder value. The Group's corporate structure is considered appropriate for the size of Group.

Corporate Governance (continued)
For the year ended 31 December 2023

Matters considered by the Remuneration Committee, the Audit Committee and the Nominations Committee are recommended to the Board for approval by the full Board. Each Committee meets in accordance with its Terms of Reference and is assisted by the Company Secretary as appropriate.

The Company has instigated a range of policies to help generate a strong and open corporate culture, not only between Directors and staff but also with shareholders, suppliers, services providers and the communities within which the Company operates. During the year, the Board reviewed and updated the Company's financial position and prospects procedures and circulated to staff as appropriate. Updated policies include:

Whistleblowing policy

The Company has a whistleblowing policy which would enable employees, service providers and other third parties to report and to take advice on any malpractice or illegal act or omission by others.

Anti-bribery and corruption policy

The Company's Anti-Bribery and Corruption policy sets out the Company's expectation that all employees and service providers to conduct their day-to-day business activities in a fair, honest and ethical manner.

Health and safety policy

The Company seeks to ensure a high level of health, safety and security standards, ensuring staff receive appropriate training to work safely in the potentially adverse conditions in Nevada. The Company is committed to providing a safe working environment for employees and service providers and health and safety is a key risk identified in the Company's risk register.

Share dealing policy

The Company has adopted a share dealing policy for Directors' and employees' dealings in securities which is appropriate for a company whose securities are traded on AIM and the Euronext Growth Market and is in accordance with the requirements of the Market Abuse Regulation. The Company takes all reasonable steps to ensure compliance with the share dealing policy by the Directors and employees.

9. Maintain governance structures and processes that are fit for purpose and support good decision-making by the Board

The Board is responsible for all aspects of the Company's activities. The Executive Chairman is responsible for the effectiveness of the Board and for primary contact with shareholders with management of the Company's business overseen by the Executive Directors.

The Board has agreed a series of matters reserved for its decision and has approved terms of reference for the Audit Committee, the Remuneration Committee and the Nominations Committee. The chair of each committee reports to the Board on the activities of that committee.

The Executive Chairman has overall responsibility for corporate governance and for promoting high standards throughout the Company. He chairs the Board, ensuring the Committees have appropriate terms of reference and are conducted in accordance therewith, considers the performance of individual Directors, provides leadership in the development of strategy and setting objectives, and is responsible for communication between the Company and its shareholders.

The three Executive Directors, including the Executive Chairman, are responsible for implementing and delivering the strategy and operational decisions agreed by the Board, including the operational and financial decisions required in the day-to-day management of the company. The Non-Executive Directors contribute independent thinking and judgement through the application of external experience and knowledge, review and challenge the performance and recommendations of Executive management and ensure that the Company is conducted in accordance with the governance and risk framework approved by the Board.

Corporate Governance (continued)
For the year ended 31 December 2023

10. Communicate how the company is governed and performing by maintaining a dialogue with shareholders and other relevant stakeholders

The Board recognises that it is accountable to shareholders for the implementation of the Company's strategy, performance and activities and is committed to providing effective communication with shareholders. The Company provides regular operational updates published through stock exchange announcements and the Company's website. The Annual General Meeting is considered a significant forum for dialogue with its shareholders. The Board supports measures to provide additional opportunities for the Company to disseminate published news through social media, to present information on activities and to liaise with shareholders outside the Annual General Meeting and informs shareholders of these opportunities as they arise. The Company provides summaries of the work undertaken by and the conclusions of the Audit Committee and Remuneration Committee in the Annual Report.

By order of the Board

Brian Hall
Executive Chairman
Date: 8 May 2024

Environmental, Social and Governance

Great Western is aware of the potential impact that the Group's activities may have on the environment and therefore complies with the local regulatory requirements as a minimum with regard to its own operations and operations conducted by previous holders of its claims. During the year, the Board updated existing and implemented new policies and procedures in order to reflect developments in matters affecting the Group.

Environment

The Group is committed to applying best practices, using current technology to design and manage the Group's operations to minimise the impact on the environment. Where possible the Group will utilise existing equipment and infrastructure to reduce the impact on the environment and reclaim land disturbed by operations.

Social

The Group is committed to engaging with local communities and creating opportunities to enable those communities to participate in assisting the Group's activities. The Board also recognises its ethical and legal responsibility to work with indigenous title communities to maintain relationships. The Company ensures that it engages with indigenous title communities and external expert consultants in order to identify and preserve cultural heritage sites.

Governance

The Board is committed to ensuring that the Group institutes and maintains the highest standards of safety, environmental, financial, and business ethics and reviews and adapts the Group's policies accordingly.

**Statement of Directors' Responsibilities in respect of the Annual Report and the Financial Statements
For the year ended 31 December 2023**

The directors are responsible for preparing the annual report and the Group and Company financial statements in accordance with applicable law and regulations.

Company law requires the directors to prepare Group and Company financial statements for each financial year. As required by the AIM and Euronext Growth Rules, they are required to prepare the Group financial statements in accordance with IFRS as adopted by the EU. The directors have elected to prepare the Company financial statements in accordance with IFRS as adopted by the EU and as applied in accordance with the Companies Act 2014.

Under company law the directors must not approve the Group and Company financial statements unless they are satisfied that they give a true and fair view of the assets, liabilities and financial position of the Group and Company and of the Group's profit or loss for that year. In preparing each of the Group and Company financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether applicable Accounting Standards have been followed, subject to any material departures disclosed and explained in the financial statements;
- assess the Group and Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and
- use the going concern basis of accounting unless they either intend to liquidate the Group or Company or to cease operations, or have no realistic alternative but to do so.

The directors are responsible for keeping adequate accounting records which disclose with reasonable accuracy at any time the assets, liabilities, financial position of the Group and Company and the profit and loss of the Group and which enable them to ensure that the financial statements comply with the provision of the Companies Act 2014. The directors are also responsible for taking all reasonable steps to ensure such records are kept by its subsidiaries which enable them to ensure that the financial statements of the Group comply with the provisions of the Companies Act 2014. They are responsible for such internal controls as they determine are necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error, and have a general responsibility for safeguarding the assets of the Company and the Group, and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities. The directors are also responsible for preparing a directors' report that complies with the requirements of the Companies Act 2014.

The directors are responsible for the maintenance and integrity of the corporate and financial information included on the Company's website. Legislation in the Republic of Ireland governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

On behalf of the Board

Brian Hall
Executive Chairman

Max Williams
Finance Director

Date: 8 May 2024

Independent Auditor's Report to the Members of Great Western Mining Corporation PLC
For the year ended 31 December 2023

Opinion

We have audited the financial statements of Great Western Mining Corporation PLC and its subsidiaries (the 'group') for the year ended 31 December 2023 which comprise the Consolidated Statement of Comprehensive Income, the Consolidated and Parent Company Statements of Financial Position, the Consolidated and Parent Company Statements of Changes in Equity, the Consolidated and Parent Company Statements of Cash Flows and notes to the financial statements, including a summary of significant accounting policies. The financial reporting framework that has been applied in their preparation is Irish law and International Financial Reporting Standards (IFRSs) as adopted by the European Union and as regards the parent company financial statements, as applied in accordance with the provisions of the Companies Act 2014.

In our opinion:

- the financial statements give a true and fair view of the state of the group's and of the parent assets, liabilities and financial position as at 31 December 2023 and of the group's and parent company's loss for the year then ended;
- the group financial statements have been properly prepared in accordance with IFRS as adopted by the European Union;
- the parent company financial statements have been properly prepared in accordance with IFRSs as adopted by the European Union and as applied in accordance with the provisions of the Companies Act 2014; and
- the financial statements have been prepared in accordance with the requirements of the Companies Act 2014.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report. We are independent of the group and parent company in accordance with ethical requirements that are relevant to our audit of financial statements in Ireland, including the Ethical Standard issued by the Irish Auditing and Accounting Supervisory Authority (IAASA) as applied to listed entities, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Materiality uncertainty related to Going Concern

In auditing the financial statements, we have concluded that the director's use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

We draw attention to note 2 in the financial statements concerning the group and parent's ability to continue as a going concern. The Group incurred a loss for the year of €952,654 (2022: loss of €792,263) after exchange loss on retranslation of foreign operations of €13,257 (2022: Loss of €46,807) at the balance sheet date. The Group had net asset of €8,831,416 (2022: €8,618,024) and the Company had net assets of €6,395,667 (2022: €6,953,807) at the balance sheet date. The going concern assumption of the group and parent company is dependent on the group and parent company obtaining additional finance to meet the working capital needs for a period of not less than twelve months from the date of approval of the financial statements.

Independent Auditor's Report (continued)
For the year ended 31 December 2023

These events and conditions, along with the other matters as set forth in note 2 to the financial statements, indicate that a material uncertainty exists that may cast significant doubt on the group and parent company's ability to continue as a going concern. Our opinion is not modified in respect of this matter.

Our evaluation of the directors' assessment of the group's and parent company's ability to adopt the going concern basis of accounting included:

- Obtaining an understanding of the group and parent company's relevant controls over the preparation and review of cash flow projections and assumptions used in the cash flow forecasts to support the going concern assumption and assessed the design and implementation of these controls;
- Challenging the key assumptions used in the cash flow forecasts by agreement to historical run rates, expenditure commitments and other supporting documentation;
- Testing the clerical accuracy of the cash flow forecasts;
- Sensitivity analysis on the cash flow forecasts to assess the amount of headroom available to the group and parent company based on its year end cash position;
- Assessment of the group and parent company's ability to raise additional finance; and
- Assessment of the adequacy of the disclosures in the financial statements with a particular focus on appropriate disclosure of the key uncertainties relating to going concern.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

Our application of materiality

The materiality applied to the group financial statements was €123,000. This has been calculated using Gross Assets benchmarks which we have determined, in our professional judgement, to be the most appropriate benchmarks within the financial statements relevant to the members of the Group in assessing financial performance. The materiality applied to the parent company financial statements was €57,584 based upon 3% of Profit/(loss) before tax. Performance materiality was 75% of overall materiality for the group and parent company.

We report to the Audit Committee all corrected and uncorrected misstatements we identified through our audit in excess of € 4,700 for the group and parent company. We evaluate any uncorrected misstatements against both the quantitative measures of materiality discussed above and in light of other relevant qualitative considerations in forming our opinion.

An overview of the scope of our audit

In designing our audit, we determined materiality and assessed the risk of material misstatement in the financial statements. In particular, we looked at areas involving significant accounting estimates and judgement by the directors and considered future events that are inherently uncertain. We also addressed the risk of management override of controls, including among other matters consideration of whether there was evidence of bias that represented a risk of material misstatement due to fraud.

The group and its two subsidiaries are accounted for from a central location in Surrey, United Kingdom.

Independent Auditor's Report (continued)
For the year ended 31 December 2023

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period and include the most significant assessed risks of material misstatement (whether or not due to fraud) we identified, including those which had the greatest effect on: the overall audit strategy, the allocation of resources in the audit; and directing the efforts of the engagement team. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key Audit Matter	How the scope of our audit addressed the key audit matter
<p>1. Valuation and recoverability of intangible assets – Exploration and Evaluation assets (refer note 11)</p> <p>The group carries a material amount of intangible assets in relation to capitalised costs associated with group's exploration activities in both the consolidated balance sheet and parent company balance sheet. As a result, the following risks arise:</p> <ul style="list-style-type: none"> - Costs may have been incorrectly capitalised and not conform with all the 6 step criteria detailed in IAS 38. - The carrying value of the capitalised cost may be overstated and the realisation of these intangible assets is dependent on the discovery and successful development of mineral reserves, which is subject to a number of risks and uncertainties, including obtaining title to licences and the ability of the group to raise sufficient finance to develop the projects. - There is a significant risk in relation to the recoverability of the E&E assets given the judgement in determining whether an indication of impairment exists as per IFRS 6. 	<p>The work undertaken to mitigate the risks were as follows:</p> <ul style="list-style-type: none"> • We reviewed and challenged management's assessment of impairment of exploration activities, considered whether there are any indicators of impairment as per IFRS 6. We found the judgements used by management in their impairment assessment were reasonable. • We verified the capitalised exploration costs meet the eligibility criteria detailed in IAS 38 for that given site. • We substantively tested additions in the year back to supporting documentation to include licences held by the group and parent company to identify terms and commitments in relation to those licences. • We also considered the adequacy of the disclosures included in the financial statements in accordance with IFRS. • We reviewed management's assessment on budget to analyse the planned expenditure on each claim group and future cash flow forecasting to determine if the entity has enough funds to operate the exploration and evaluation activities.

Independent Auditor's Report (continued)
For the year ended 31 December 2023

Key Audit Matter	How the scope of our audit addressed the key audit matter
<p>Recoverability of Amount owed to subsidiary undertaking of GWM Corporation PLC (refer note 12)</p> <p>- There is a risk that the carrying value of intercompany receivables in the Great Western Mining Corporation PLC company financial statement will be greater than the estimated recoverable amount.</p> <p>- There is a significant risk in relation to the carrying value to the investments and recoverability of the Intercompany receivables given the level of judgement in determining whether an indication of impairment exists and is reasonable.</p>	<p>The work undertaken to mitigate the risks were as follows:</p> <ul style="list-style-type: none"> • We reviewed management's assessment of impairment computation and estimation policy, considered whether there are any other indicators of impairment. We found the judgements used by management in their impairment assessment were reasonable. • We challenged management assessment by performing detailed audit procedures to gain understanding of the process around the recoverability. • Comparing the Group net assets to the net assets of the company only accounts. • We also considered the adequacy of the disclosures included in the financial statements in accordance with IFRS.

Other information

The other information comprises the information included in the annual report, other than the financial statements and our auditor's report thereon. The directors are responsible for the other information. Our opinion on the group and parent company financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements, or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Independent Auditor's Report (continued)
For the year ended 31 December 2023

Opinions on other matters prescribed by the Companies Act 2014

In our opinion, based on the work undertaken in the course of the audit, we report that:

- the information given in the directors' report for the financial year for which the financial statements are prepared is consistent with the financial statements; and
- the directors' report has been prepared in accordance with the Companies Act 2014.

We have obtained all the information and explanations which we consider necessary for the purpose of our audit.

In our opinion, the accounting records of the Company were sufficient to permit the financial statements to be readily and properly audited and the financial statements are in agreement with the accounting records.

Matters on which we are required to report by exception

Based on the knowledge and understanding of the company and its environment obtained in the course of the audit, we have not identified material misstatements in the directors' report.

The Companies Act 2014 requires us to report to you if, in our opinion, the disclosures of directors' remuneration and transactions required by Sections 305 to 312 of the Act are not made. We have nothing to report in this regard.

Responsibilities of directors

As explained more fully in the Directors' Responsibilities Statement, the directors are responsible for the preparation of the group and parent company financial statements and for being satisfied that they give a true and fair view, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the group and parent company financial statements, the directors are responsible for assessing the group's and the parent company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the group or the parent company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. Based on our understanding of the group and industry, we identified that the principal risks of non-compliance with laws and regulations related to those directly impacting the preparation of the financial statements, such as the Companies Act 2014 and the AIM Rules. There are no significant laws and regulations currently impacting the trading activities of the group other than compliance with normal business contractual terms.

Independent Auditor's Report (continued)
For the year ended 31 December 2023

We evaluated management's incentives and opportunities for fraudulent manipulation of the financial statements, and determined that the principal risks related to management bias through judgements and assumptions in significant accounting estimates, and to posting inappropriate journal entries. The key audit matters section of our report explains the specific procedures performed in respect of the valuation and recoverability of intangible assets.

Auditor's responsibilities for the audit of the financial statements (continued)

Our audit procedures performed included:

- Discussions with and inquiry of management and those charged with governance in relation to known or suspected instances of non-compliance with laws and regulations and fraud;
- Review of minutes from board and other committee meetings;
- Challenging assumptions and judgements made by management in their significant accounting estimates;
- Testing the appropriateness of journal entries and other adjustments, and evaluating the business rationale of any significant transactions that are unusual or outside the normal terms of business.

Because of the inherent limitations of an audit, there is a risk that we will not detect all irregularities, including those leading to a material misstatement in the financial statements or non-compliance with regulation. This risk increases the more that compliance with a law or regulation is removed from the events and transactions reflected in the financial statements, as we will be less likely to become aware of instances of non-compliance. The risk is also greater regarding irregularities occurring due to fraud rather than error, as fraud involves intentional concealment, forgery, collusion, omission or misrepresentation.

A further description of our responsibilities for the audit of the financial statements is located on the IAASA's website at: <https://www.iaasa.ie/Publications/Auditing-standards/>

This description forms part of our auditor's report.

Use of our report

This report is made solely to the company's members, as a body, in accordance with Section 391 of the Companies Act 2014. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone, other than the company and the company's members as a body, for our audit work, for this report, or for the opinions we have formed.

Notes to the Financial Statements

For the year ended 31 December 2023

1. Accounting policies

Great Western Mining Corporation PLC (“the Company”) is a Company domiciled and incorporated in Ireland. The Company is listed on the Euronext Growth Market in Dublin and on AIM in London. The Group financial statements consolidate the individual financial statements of the Company and its subsidiaries (“the Group”).

Basis of preparation

The Group and the Company financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as adopted by the European Union (“EU”).

Statement of compliance

The Group financial statements have been prepared and approved by the Directors in accordance with International Financial Reporting Standards and their interpretations as adopted by the European Union (“EU IFRSs”). The individual financial statements of the Company have been prepared and approved by the Directors in accordance with EU IFRSs and as applied in accordance with the provisions of the Companies Act 2014 which permits a Company that publishes its Company and Group financial statements together, to take advantage of the exemption in Section 304 of the Companies Act 2014 from presenting to its members its Company income statement and related notes that form part of the approved Company financial statements.

The EU IFRSs applied by the Company and the Group in the preparation of these financial statements are those that were effective for accounting periods ending on or before 31 December 2023.

New accounting standards and interpretations adopted

Below is a list of standards and interpretations that were required to be applied in the year ended 31 December 2023. There was no material impact to the financial statements in the current year from these standards set out below:

- IFRS 17 Insurance Contracts – *effective 1 January 2023*
- Amendments to IAS 1 and IFRS Practice Statement 2: Disclosure of Accounting Policies – *effective 1 January 2023*
- Amendments to IAS 8: Definition of Accounting Estimate – *effective 1 January 2023*
- Amendments to IAS 12 Income Taxes: Deferred Tax Related to Assets and Liabilities Arising from a Single Transaction – *effective 1 January 2023*
- Amendments to IAS 12 Income Taxes: International Tax Reform – Pillar Two Model Rules – *effective 23 May 2023*

New accounting standards and interpretations not adopted

Standards endorsed by the EU that are not yet required to be applied but can be early adopted are set out below. None of these standards have been applied in the current period. The Group is currently assessing whether these standards will have a material impact in the financial statements.

- Amendments to IAS 1: Classification of liabilities as current or non-current – *effective 1 January 2024*
- Amendments to IFRS 16: Lease Liability in a Sale and Leaseback – *effective 1 January 2024*
- Amendments to IAS 7 and IFRS 17: Supplier Finance Arrangements – *effective 1 January 2024*
- IFRS 51: General requirements for Disclosure of Sustainability-related Financial information and IFRS 52 Climate-related Disclosures – *effective 1 January 2024*
- Amendments to IAS 21: Lack of Exchangeability – *effective 1 January 2025*

Notes to the Financial Statements (continued)
For the year ended 31 December 2023

New accounting standards and interpretations not adopted (continued)

The following standards have been issued by the IASB but have not been endorsed by the EU, accordingly none of these standards have been applied in the current period and the Group is currently assessing whether these standards will have a material impact in the financial statements.

- Amendments to IFRS 10 and IAS 28: Sale and Contribution of Assets between an Investor and its Associate or Joint Venture – *optional*

Functional and Presentation Currency

The presentation currency of the Group and the functional currency of Great Western Mining Corporation PLC is the Euro (“€”) representing the currency of the primary economic environment in which the Group operates.

Use of Estimates and Judgements

The preparation of financial statements in conformity with IFRS requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making judgements about carrying values of assets and liabilities that are not readily apparent from other sources.

In particular, significant areas of estimation uncertainty in applying accounting policies that have the most significant effect on the amount recognised in the financial statements are in the following area:

- Note 19 – Share based payments, including share option and share warrant valuations.

In particular, significant areas of critical judgements in applying accounting policies that have the most significant effect on the amount recognised in the financial statements are in the following areas:

- Note 11 – Intangible asset, consideration of impairment of carrying value of claim groups.
- Note 11 – Intangible asset, consideration of impairment relating to net assets being lower than market capitalisation.
- Note 12 – Amounts owed by subsidiary, expected credit loss.
- Note 16 – Decommissioning provision.

Notes to the Financial Statements (continued)
For the year ended 31 December 2023

Basis of Consolidation

The consolidated financial statements comprise the financial statements of Great Western Mining Corporation PLC and its subsidiary undertakings for the year ended 31 December 2023.

Subsidiaries are consolidated from the date on which control is transferred to the Group and cease to be consolidated from the date on which control is transferred out of the Group. Control exists when the Company is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Financial statements of subsidiaries are prepared for the same reporting year as the parent company.

Upon the loss of control, the Group derecognises the assets and liabilities of the subsidiary, and no controlling interests and the other components of equity related to the subsidiary. Any surplus or deficit arising on the loss of control is recognised in the income statement. If the Group retains any interest in the previous subsidiary, then such interest is measured at fair value at the date control is lost. Subsequently, it is accounted for an equity-accounted investee or as an available for sale financial asset, depending on the level of influence retained.

Intragroup balances and transactions, including any unrealised gains arising from intragroup transactions, are eliminated in preparing the Group financial statements. Unrealised losses are eliminated in the same manner as unrealised gains except to the extent that there is evidence of impairment.

Investments in Subsidiaries

In the Company's own statement of financial position, investments in subsidiaries are stated at cost less provisions for any impairment.

Intangible Assets – Exploration and Evaluation Assets

The Directors have designated that an individual exploration and evaluation asset is a group of claims which provide separate areas of interest in different geographic locations. Each group of claims may comprise more than one area of exploration interest. Exploration expenditure in respect of properties and licences not in production is capitalised and is carried forward in the statement of financial position under intangible assets in respect of each area of interest where:

- (i) the operations are ongoing in the area of interest and exploration or evaluation activities have not reached a stage which permits a reasonable assessment of the existence or otherwise of economically recoverable reserves; and
- (ii) such costs are expected to be recouped through successful development and exploration of the area of interest or alternatively by its realisation.

Exploration costs include licence costs, survey, geophysical and geological analysis and evaluation costs, costs of drilling and project-related overheads. Where the Company undertakes the evaluation and appraisal of historical waste material at surface, the costs of evaluation are capitalised in exploration and evaluation assets. Capitalised exploration and evaluation expenditures are not amortised prior to the conclusion of exploration and appraisal activity.

Exploration and evaluation assets will be reclassified to property, plant and equipment as a cash-generating unit when a commercially viable reserve has been determined, all approvals and permits have been obtained. On reclassification, the carrying value of the asset will be assessed for impairment and, where appropriate, the carrying value will be adjusted. If, after completion of exploration, evaluation and appraisal activities the conditions for achieving a cash-generating unit are not met, the associated expenditures are written off to the income statement.

Notes to the Financial Statements (continued)
For the year ended 31 December 2023

Decommissioning Provision

There is uncertainty around the cost of decommissioning as cost estimates can vary in response to many factors, including changes to the relevant legal requirements, the emergence of new technology or experience at other assets. The expected timing, work scope and amount and currency mix of expenditure required may also change. Therefore, significant estimates and assumptions are made in determining the provision for decommissioning. Provision for environmental clean-up and remediation costs is based on current legal and contractual requirements, technology and management's estimate of costs with reference to current price levels and the estimated costs calculated by the regulatory authorities.

Impairment

The carrying amounts of the Group's non-financial assets, other than deferred tax assets, are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the amount recoverable from the assets is estimated. For intangible assets that have indefinite lives or that are not yet available for use, the recoverable amount is estimated at each reporting date.

Under IFRS 6, the following indicators are set out to determine whether an exploration and evaluation asset is required to be tested for impairment:

- the period for which the entity has the right to explore in the specific area has expired during the period or will expire in the near future, and is not expected to be renewed;
- substantive expenditure on further exploration for and evaluation of mineral resources in the specific area is neither budgeted nor planned;
- exploration for and evaluation of mineral resources in the specific area have not led to the discovery of commercially viable quantities of mineral resources and the entity has decided to discontinue such activities in the specific area; and
- sufficient data exists to indicate that, although a development in the specific area is likely to proceed, the carrying amount of the exploration and evaluation asset is unlikely to be recovered in full from successful development or by sale.

The list is not exhaustive, and the Group also considers the following additional tests: current cash available to the Group and its capacity to raise additional funds; commodity prices and markets; taxation and the regulatory regime; access to equipment, materials and services; and the comparison of the Group's net assets with the market capitalisation of the Company.

An impairment loss is recognised if the carrying amount of an asset or its cash-generating unit exceeds its recoverable amount. A cash-generating unit is the smallest identifiable asset Group that is expected to generate cash flows that is largely independent from other assets and Groups of assets. Impairment losses are recognised in the Statement of Comprehensive Income. Impairment losses recognised in respect of cash-generating units are allocated first to reduce the carrying amount of any goodwill allocated to the units and then to reduce the carrying amount of the other assets in the unit (group of units) on a pro rata basis.

The recoverable amount of an asset or cash generating unit is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risk specific to the asset.

Notes to the Financial Statements (continued)
For the year ended 31 December 2023

Taxation

Income tax expense comprises current and deferred tax. Income tax expense is recognised in profit and loss except to the extent that it relates to items recognised in other comprehensive income or directly in equity, in which case the tax is also recognised in other comprehensive income or equity respectively.

Current corporation tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

Special tax deductions for qualifying expenditure claimed by the Group are in accordance with the Research and Development Tax Incentive regime in the UK. The Group accounts for such allowances as tax credits, which reduces income tax payable and current tax expense.

Deferred tax is recognised using the liability method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is not recognised for the following temporary differences: the initial recognition of goodwill, the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit, and differences relating to investments in subsidiaries to the extent that they probably will not reverse in the foreseeable future. Deferred tax is measured at the tax rates that are expected to be applied to the temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date.

A deferred tax asset is recognised to the extent that it is probable that future taxable profits will be available against which temporary difference can be utilised. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

Additional income taxes that arise from the distribution of dividends are recognised at the same time as the liability to pay the related dividends is recognised.

Employee Benefits

Equity-Settled Share-Based Payments

For equity-settled share-based payment transactions (i.e. the issuance of share options in accordance with the Group's share option scheme or share warrants granted in relation to services provided), the Group measures the services received by reference to the value of the option or other financial instrument at fair value at the measurement date (which is the grant date) using a recognised valuation methodology for the pricing of financial instruments (the binomial option pricing model). If the share options granted do not vest until the completion of a specified period of service, the fair value assessed at the grant date is recognised in the income statement over the vesting period as the services are rendered by employees with a corresponding increase in equity. For options granted with no vesting period, the fair value is recognised in the income statement at the date of the grant. For share warrants granted in relation to services provided, the fair value is an issue cost and is accordingly recognised in retained earnings. The fair value of equity-settled share-based payments on exercise is released to the share premium account. When equity settled share-based payments which have not been exercised reach the end of the original contractual life, whether share options or share warrants, the value is transferred from the share option reserve to retained earnings.

Notes to the Financial Statements (continued)
For the year ended 31 December 2023

Foreign Currencies

Transactions in foreign currencies are recorded at the rate of exchange ruling at the date of the transaction. Monetary assets and liabilities denominated in a foreign currency are translated into the functional currency at the exchange rate ruling at the reporting date, unless specifically covered by foreign exchange contracts whereupon the contract rate is used. All translation differences are taken to the income statement with the exception of foreign currency differences arising on net investment in a foreign operation. These are recognised in other comprehensive income.

Results and cash flows of non-Euro subsidiary undertakings are translated into Euro at average exchange rates for the year and the related assets and liabilities are translated at the rates of exchange ruling at the reporting date. Adjustments arising on translation of the results of non-Euro subsidiary undertakings at average rates, and on the restatement of the opening net assets at closing rates, are dealt with in a separate translation reserve within equity. Proceeds from the issue of share capital are recognised at the prevailing exchange rate on the date that the Board of Directors ratifies such issuance; and foreign exchange movement arising between the date of issue and the date of receipt of funds is credited or charged to the income statement.

The principal exchange rates used for the translation of results, cash flows and balance sheets into Euro were as follows:

	Average rate		Spot rate at year end	
	2023	2022	2023	2022
1 GPD	0.8678	0.8526	0.8691	0.8869
1 USD	1.0813	1.0530	1.1050	1.0666

On loss of control of a foreign operation, accumulated currency translation differences are recognised in the income statement as part of the overall gain or loss on disposal.

Notes to the Financial Statements (continued)
For the year ended 31 December 2023

Property, plant and equipment

Property, plant and equipment under the cost model are stated at historical cost less accumulated depreciation and any accumulated impairment losses. Historical cost includes expenditure that is directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management.

Depreciation is provided on the following basis:

Land and property	-	0%
Plant & machinery	-	33.33% straight line
Motor vehicles	-	33.33% straight line

On disposal of property, plant and equipment, the cost and related accumulated depreciation and impairments are removed from the financial statements and the net amounts less any proceeds are taken to the income statement.

The carrying amounts of property, plant and equipment are reviewed at each balance sheet date to determine whether there is any indication of impairment. An impairment loss is recognised whenever the carrying amount of an asset or its cash generating unit exceeds its recoverable amount. Impairment losses are recognised in the income statement.

Subsequent costs are included in an asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the replaced item can be measured reliably. All other repair and maintenance costs are charged to the income statement during the financial period in which they are incurred.

Financial Instruments

Cash and Cash Equivalents

Cash and cash equivalents in the Statement of Financial Position comprise cash at bank and in hand and short-term deposits with an original maturity of three months or less. Bank overdrafts that are repayable on demand and form part of the Group's cash management are included as a component of cash and cash equivalents for the purpose of Statement of Cash Flows.

Trade and Other Receivables / Payables

Except for the decommissioning provision and financial liabilities arising on the grant of share warrants, trade and other receivables and payables are stated at cost less impairment, which approximates fair value given the short-dated nature of these assets and liabilities. There are no expected credit losses on amounts due from subsidiaries and therefore no expected credit loss provision has been recognised.

Financial assets – amounts owed by subsidiary undertakings

Financial assets are classified as measured at amortised cost when they are held in a business model the objective of which is to collect contractual cash flows and the contractual cash flows represent solely payments of principal and interest. Such assets are carried at amortised cost using the effective interest method if the time value of money is significant. Gains and losses are recognised in profit or loss when the assets are derecognised or impaired and when interest is recognised using the effective interest rate method. This category of financial assets includes trade and other receivables and loans provided to subsidiary undertakings of the Company.

Impairment of financial assets

The expected credit loss model is applied for recognition and measurement of impairments in financial assets measured at amortised cost. The loss allowance for the financial asset is measured at an amount equal to the life-time expected credit losses. Changes in loss allowances are recognised in profit and loss.

Notes to the Financial Statements (continued)
For the year ended 31 December 2023

Share Warrant Provision

The fair value of an equity classified warrant is measured using the binomial option pricing model. As the warrant price is in a different currency to the functional currency of the Company, the share warrant provision creates a financial liability. The fair value is remeasured at each period end and any movement charged or credited to the income statement. The fair value of the liability settled by the issue of shares is credited to the share premium account. The fair value on exercise is credited to the share premium account.

Provisions

Provisions are recognised when the Group has a present obligation (legal or constructive) as a result of a past event and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of this obligation. Where the Group expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the Consolidated Statement of Comprehensive Income net of any reimbursement. If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

Contingencies

A contingent liability is disclosed where the existence of an obligation will only be confirmed by future events or where the amount of the obligation cannot be measured with reasonable reliability. Contingent assets are not recognised but are disclosed where an inflow of economic benefit is probable.

Notes to the Financial Statements (continued)
For the year ended 31 December 2023

2. Going concern

The financial statements of the Group and Parent Company are prepared on a going concern basis.

In order to assess the appropriateness of the going concern basis in preparing the financial statements for the year ended 31 December 2023, the Directors have considered a time period of at least twelve months from the date of approval of these financial statements.

The Group incurred an operating loss during the year ended 31 December 2023. At the balance sheet date, the Group had cash and cash equivalents amounting to €0.10 million and the Company raised an additional amount of €0.82 million (before transactions expenses) through a placing completed in March 2024. The future of the Company is dependent on the successful outcome of its exploration activities and implementation of revenue-generating operations. The Directors believe that the Group's ability to make additional capital expenditure on its lode claims in Nevada will be assisted by the generation of first revenues from the reprocessing of historical spoil heaps and tailings. The Directors are seeking a joint venture partner to provide funding to enable the acceleration of the Group's Huntoon Copper Project. The Directors also believe that the Group's cash flow can be further assisted, if necessary, by raising additional capital, the deferral of planned expenditure and other cost saving actions, loan facilities for revenue-generating operations or from future revenues. The Directors have taken into consideration the Company's successful completion of placings in recent years, including placings completed in January and August 2023 and March 2024, to provide additional cash resources.

The Directors concluded that the Group will have sufficient resources to continue as a going concern for the future, that is for a period of not less than 12 months from the date of approval of the consolidated financial statements.

However, there exists a material uncertainty that may cast significant doubt over the ability of the Group to continue as a going concern. The Group may be unable to realise its assets and discharge its liabilities in the normal course of business if it is unable to raise funds for further exploration on and development of its exploration assets. The condensed consolidated statements have been prepared on a going concern basis and do not include any adjustments that would be necessary if this basis were inappropriate.

3. Segment information

The Group has one principal reportable segment - Nevada, USA, which represents the exploration for and development of copper, silver, gold and other minerals in Nevada, USA.

Other operations "Corporate Activities" includes cash resources held by the Group and other operational expenditure incurred by the Group. These assets and activities are not within the definition of an operating segment.

In the opinion of the Directors the operations of the Group comprise one class of business, being the exploration and development of copper, silver, gold and other minerals. The Group's main operations are located within Nevada, USA. The information reported to the Group's chief executive officer (the Executive Chairman) who is the chief operating decision maker, for the purposes of resource allocation and assessment of segmental performance is particularly focussed on the exploration activity in Nevada.

Information regarding the Group's results, assets and liabilities is presented below.

Notes to the Financial Statements (continued)
For the year ended 31 December 2023

3. Segment information (continued)

Segment results

	Revenue		Loss

Own costs capitalised	(45,221)	-	-	-
	545,474	596,707	185,544	212,394

7. Income tax - expense

	2023	2022
	€	€
Current tax credit	(43,782)	(61,142)
Adjustment for previous period	6,624	(97,362)
	(37,158)	(158,504)

The income tax expense for the year can be reconciled to the accounting loss as follows:

	2023	2022
	€	€
Loss before tax	(989,812)	(950,767)
Income tax calculated at 12.5% (2022: 12.5%)	(123,727)	(118,846)
Effects of:		
Expenses not deductible for tax purposes	16,219	21,107
Income not taxable	-	(12,037)
Losses carried forward	107,508	109,776
Adjustment for UK research and development tax credit	(37,158)	(158,504)
Income tax (credit)/expense	(37,158)	(158,504)

The tax rate used for the year end reconciliations above is the corporation rate of 12.5% payable by corporate entities in Ireland on taxable profits under tax law in the jurisdiction of Ireland.

At the statement of financial position date, the Group had unused tax losses of €8,390,479 (2022: €7,616,147) available for offset against future profits. No deferred tax asset has been recognised due to the unpredictability of future profit streams. Unused tax losses may be carried forward indefinitely.

Notes to the Financial Statements (continued)
For the year ended 31 December 2023

8. Loss per share

Basic earnings per share

The basic and weighted average number of ordinary shares used in the calculation of basic earnings per share are as follows:

	2023 €	2022 €
Loss for the year attribute to equity holders of the parent	<u>(952,654)</u>	<u>(792,263)</u>
Number of ordinary shares at start of year	3,577,510,005	3,577,510,005
Number of ordinary shares issued during the year	1,909,090,914	-
Number of ordinary shares in issue at end of year	5,486,600,919	3,577,510,005
Weighted average number of ordinary shares for the purposes of basic earnings per share	4,905,222,617	3,577,510,005
Basic loss per ordinary share (cent)	<u>(0.0002)</u>	<u>(0.0002)</u>

Diluted earnings per share

There were no potentially dilutive ordinary shares that would increase the basic loss per share.

9. Investments in subsidiaries

	2023 €	2022 €
Subsidiary undertakings - unlisted		
Investment cost	<u>500,001</u>	<u>500,001</u>
	500,001	500,001

The Directors reviewed the recoverability of the investments and concluded there was no impairment and that the carrying value of these investments to be fully recoverable.

At 31 December 2023, the Company had the following subsidiary undertakings:

Name	Incorporated in	Main activity	Holdings
Great Western Mining Corporation Inc.	Nevada, U.S.A.	Mineral Exploration	100%
GWM Operations Limited	UK	Service Company	100%

Notes to the Financial Statements (continued)

Net book value		
At 31 December 2023	<u>8,603,289</u>	<u>8,603,289</u>
At 31 December 2022	<u>8,462,329</u>	<u>8,462,329</u>

The Directors have reviewed the carrying value of the exploration and evaluation assets. These assets are carried at historical cost and have been assessed for impairment in particular with regards to specific indicators as set out in IFRS 6 'Exploration for and Evaluation of Mineral Resources' relating to remaining licence or claim terms, likelihood of renewal, likelihood of further expenditures, possible discontinuation of activities over specific claims and available data which may suggest that the recoverable value of an exploration and evaluation asset is less than carrying amount. The Directors considered other factors in assessing potential impairment including cash available to the Group, commodity prices and markets, taxation and regulatory regime and access to equipment. The Directors also considered the carrying amount of the Company's net assets in relation to its market capitalisation. The Directors are satisfied that no impairment is required as at 31 December 2023. The realisation of the intangible assets is dependent on the successful identification and exploitation of copper, silver, gold and other mineral in the Group's licence area, including the potential to reprocess historical spoil heaps and tailings. This is dependent on several variables including the existence of commercial mineral deposits, availability of finance and mineral prices.

Notes to the Financial Statements (continued)
For the year ended 31 December 2023

12. Amounts owed by subsidiary undertakings

Company	Total €
Cost	
At 1 January 2022	8,626,955
Advances to subsidiary undertakings	<u>1,176,388</u>
At 31 December 2022	9,803,343
Advances to subsidiary undertakings	<u>919,952</u>
At 31 December 2023	<u>10,723,295</u>
Provisions for impairment	
At 1 January 2022	1,703,600
Provision	<u>1,607,700</u>
At 31 December 2022	3,311,300
Provision	<u>1,468,970</u>
At 31 December 2023	<u>4,780,270</u>
Net book value	
At 31 December 2023	<u>5,943,025</u>
At 31 December 2022	<u>6,492,043</u>

Amounts owed by subsidiary undertakings are denominated in Euro, interest free and payable on demand. The Directors do not expect to call for repayment of these loans in the foreseeable future. The loans are expected to be repaid from future revenues generated by the Group's mining interests in Nevada, USA.

In accordance with IFRS 9, the Company has reviewed the amounts owed by subsidiary undertakings and calculated an expected credit loss equivalent to the lifetime expected credit loss. As the loans are interest free and payable on demand, the Company applies no discount when calculating the expected credit loss as the effective interest rate is considered to be 0%. Based on the calculation, the Directors have made an impairment provision of €1,468,970 as at 31 December 2023 (2022: €1,607,700). The Directors believe the net carrying value of the amounts owed by subsidiary undertakings to be fully recoverable.

Notes to the Financial Statements (continued)
For the year ended 31 December 2023

13. Trade and other receivables

	Group 2023	Group 2022	Company 2023	Company 2022
	€	€	€	€
Amounts falling due within one year:				
Other debtors	83,204	85,169	-	-

Accruals	227,259	146,778	49,423	92,511
Other taxation and social security	14,523	15,109	3,673	3,764
Amounts payable to subsidiary undertakings	-	-	67,155	61,322
	504,150	207,603	122,180	169,520

The Group has financial risk management policies in place to ensure that payables are paid within the pre-agreed credit terms (see note 22).

Notes to the Financial Statements (continued)
For the year ended 31 December 2023

16. Decommissioning provision

	Group 2023 €	Group 2022 €	Company 2023 €	Company 2022 €
Decommissioning provision	<u>128,871</u>	<u>131,421</u>	<u>-</u>	<u>-</u>

The decommissioning provisions relate to undertakings by the Group to carry out reclamation work after the completion of planned work permitted by the regulator. The cost of the reclamation work is estimated by the regulator in advance and the notice permitting operations to be conducted, together with the associated reclamation work, is effective for two years, subject to certain variations. As the Group applies for approval of operations to be conducted within the current year where possible, the cost of decommissioning provision is treated as a current asset.

17. Share warrants – financial liability

The share warrants have been granted as rights to acquire additional new ordinary share of €0.0001 in accordance with the terms of placings completed in 2019, 2020 and 2021.

The warrants are classified and accounted for as financial liabilities using Level 3 fair value measurement, with any change in fair value recorded in the Consolidated Income Statement. Level 3 fair value recognises that the inputs for any asset or liability valuation are not based on observable market data.

Group and Company

	Number of warrants	Level 3 Fair value €
At 1 January 2022	670,272,727	96,294
Released on exercise of warrants	(443,000,000)	(47,536)

At 31 December 2023	<u>5,486,600,919</u>	<u>548,660</u>	<u>14,875,499</u>	<u>15,424,159</u>

The Company did not issue shares during the year ended 31 December 2022 and accordingly there were no transaction expenses.

On 20 January 2023, the Company completed a placing for 1,000,000,000 new ordinary shares of €0.0001 ("the Placing Share"). Each Placing Share was issued at a price of €0.0008 (€0.0009) raising gross proceeds of £800,000 (€913,242) and increasing share capital by €100,000. The premium arising on the issue amounted to €813,242. The warrants were granted with an exercise price of €0.0030 and a fair value of €191,364.

On 2 August 2023, the Company completed a placing for 909,090,914 new ordinary shares of €0.0001 ("the Placing Share"). Each Placing Share was issued at a price of €0.00055 (€0.00064) raising gross proceeds of £500,000 (€581,139) and increasing share capital by €90,909. The premium arising on the issue amounted to €490,230.

Notes to the Financial Statements (continued)
For the year ended 31 December 2023

19. Share based payments

Share options

The Great Western Mining Corporation PLC operates a share options scheme, "Share Option Plan 2014", which entitles directors and employees to purchase ordinary shares in the Company at the market value of a share on the award date, subject to a maximum aggregate of 10% of the issued share capital of the Company on that date.

Measure of fair values of options

The fair value of the options granted has been measured using the binomial lattice option pricing model. The input used in the measurement of the fair value at grant date of the options were as follows:

	30 Jan 2023	23 Feb 2022
Fair value at grant date	€0.0006	€0.0011
Share price at grant date	€0.0009	€0.0016
Exercise price	€0.0009	€0.0016
Number of options granted	52,000,000	57,500,000
Vesting conditions	Immediate	Immediate
Expected volatility	108%	107.8%
Sub-optimal exercise factor	4x	4x
Expected life	7 years	7 years
Expected dividend	0%	0%
Risk free interest rate	<u>2.31%</u>	<u>0.18%</u>

During the year, the Group recognised a total expense of €38,005 (2022: €63,795) in the income statement relating to share options granted during the year:

	Number of options	Average exercise price
Outstanding at 1 January 2022	85,666,667	Stg0.62 p
Granted	<u>57,500,000</u>	<u>Stg0.13 p</u>
Authorised at 31 December 2022	143,166,667	Stg0.29 p
Granted	<u>52,000,000</u>	<u>Stg0.09 p</u>
Outstanding at 31 December 2023	<u>195,166,667</u>	<u>Stg0.24 p</u>
Exercisable at 31 December 2022	<u>195,166,667</u>	<u>Stg0.24 p</u>
Exercisable at 31 December 2022	<u>143,166,667</u>	<u>Stg0.29 p</u>

Notes to the Financial Statements (continued)
For the year ended 31 December 2023

19. Share based payments (continued)

Share options (continued)

On 31 December 2023, there were options over 195,166,667 ordinary shares outstanding (2022: 143,166,667) which are exercisable at prices ranging from Stg0.09 pence to Stg1.6 pence and which expire at various dates up to February 2029. The weighted average remaining contractual life of the options outstanding is 4 years 5 months (2022: 4 years 9 months).

Equity-settled warrants

In November 2022, broker warrants granted in November 2020 over 20,000,000 shares lapsed unexercised and an amount of €13,707 released from the share-based payment reserve to retained earnings.

In April 2023, broker warrants granted in April 2021 over 22,727,272 shares lapsed unexercised and an amount of €20,709 released from the share-based payment reserve to retained earnings

At 31 December 2023, the balance on the share-based payment reserve amounted to €386,005 (2022: €368,709).

Notes to the Financial Statements (continued)
For the year ended 31 December 2023

20. Retained losses

In accordance with Section 304 of the Companies Act 2014, the Company has not presented a separate income statement. Of the consolidated loss after taxation, a loss of €2,008,511 for the financial year ended 31 December 2023 (2022: loss of €2,039,553) has been dealt with in the Company income statement of Great Western Mining Corporation PLC.

21. Related party transactions

Intercompany transactions

In accordance with International Accounting Standards 24 – Related Party Disclosures, transactions between Group entities that have been eliminated on consolidation are not disclosed.

The Company entered in the following transactions with its subsidiary companies:

	2023	2022
	€	€
Balances at 31 December:		
Amounts owed by subsidiary undertakings	<u>5,943,025</u>	<u>6,492,043</u>
Amounts owed to subsidiary undertakings	<u>(67,155)</u>	<u>(61,322)</u>

Remuneration of key management personnel

Details of the directors' remuneration for the year is set out in Note 5. Information about the remuneration of each director is shown in the Remuneration Report on page 13. The directors are considered to be the Group's key management personnel.

	2023	2022
	€	€
Short-term benefits:	316,105	311,335
Pension contributions	-	-
Share-based payments	<u>28,504</u>	<u>43,269</u>
	<u>344,609</u>	<u>354,604</u>

The Group also entered into related party transactions with Andrew Hay Advisory Limited for corporate finance advice services and Sofabar Consulting Limited for marketing services which are companies connected with Andrew Hay and Alastair Ford respectively. The companies each received €14,946 in the period (2022: €15,245). There was a €nil balance outstanding with both companies as at 31 December 2023 (2022: €nil). Details of the directors' interests in the share capital of the Company are set out in the Directors' Report on pages 9 to 10.

Notes to the Financial Statements (continued)
For the year ended 31 December 2023

22. Financial instruments and financial risk management

Group

A. Accounting classifications and fair values

The following table shows the carrying amounts and fair values of financial assets and financial liabilities, including their levels in the fair value hierarchy. It does not include fair value information for financial assets and financial liabilities not measured at fair value if the carrying amount is a reasonable approximation of fair value. The Group does not recognise any Level 1 fair value financial assets or liabilities.

31 December 2023	FVTPL	Financial assets at amortised cost	Other financial liabilities	Carrying amount total	Level 2 Fair value	Level 3 Fair value
	€	€	€	€	€	€

Notes to the Financial Statements (continued)
For the year ended 31 December 2023

22. Financial instruments and financial risk management (continued)

Measurement of fair values

A number of the Group's accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities. Significant valuation issues are reported to the Group's audit committee.

When measuring the fair value of an asset or a liability, the Group uses observable market data as far as possible. Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows.

- **Level 1:** quoted prices (unadjusted) in active markets for identical assets or liabilities.
- **Level 2:** inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- **Level 3:** inputs for the asset or liability that are not based on observable market data (unobservable inputs).

Set out below are the major methods and assumptions used in estimating the fair values of the financial assets and liabilities set out in the table above:

Cash and cash equivalents including short-term deposits

For short-term deposits and cash and cash equivalents, all of which have a remaining maturity of less than three months, the nominal value is deemed to reflect the fair value.

Share warrants

For the financial liabilities from share warrants, the Level 3 fair value is based on the revaluation of the warrants at the year-end, including the changes to key input assumptions for expected volatility and expected exercise life.

Decommissioning provision

The fair value is based on expected costs determined in line with estimates provided by the regulator.

Trade and other payables

For the payables with a remaining maturity of less than six months or demand balances, the contractual amount payable less impairment provisions, where necessary, is deemed to reflect fair value.

B. Financial risk management

The Board has overall responsibility for the establishment and oversight of the risk management framework for each of the risks summarised below. The Board receives regular reports at board meetings through which it reviews the effectiveness of the processes put in place and the appropriateness of the objectives and policies it sets.

The Group's risk management policies are established to identify and analyse the risks faced by the Group, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Group's activities. The Group, through its training and management standards and procedures, aims to maintain a disciplined and constructive control environment in which all employees understand their roles and obligations.

Notes to the Financial Statements (continued)
For the year ended 31 December 2023

22. Financial instruments and financial risk management (continued)

The Group has exposure to the following risks arising from financial instruments:

a) Credit risk

Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations. The Group's principal credit risk arises on cash and cash equivalents, including deposits with banks. The cash and cash equivalents are held with bank and financial institution counterparties, which are rated BBB+ to AA- by Fitch Ratings.

The carrying amount of financial assets represents the maximum credit exposure. The maximum credit exposure to credit risk is:

	Group 2023	Group 2022
	€	€
Trade and other debtors	691,870	272,887
Cash and cash equivalents	95,306	145,197
	<u>787,176</u>	<u>418,084</u>

b) Liquidity risk

Liquidity risk is the risk that the Group will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Group's objective when managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Group's reputation. The Group closely monitors and manages its liquidity risk using both short and long-term cash flow projections. Cash forecasts are regularly produced, and sensitivities run for different scenarios including changes to planned work programmes. To date, the Group has relied on shareholder funding to finance its operations. Board approval would be required for any borrowing facilities and the Group did not have any bank loan facilities at 31 December 2023 or 31 December 2022.

The expected maturity of the Group's financial assets (excluding prepayments) as at 31 December 2023 and 31 December 2022 was less than one month.

The following are the contractual maturities of the financial liabilities including estimated interest payments and excluding the impact of netting agreements:

31 December 2023	Carrying amount	Contractual cashflows	0-6 months	6-12 months	1-2 years
	€	€	€	€	€
Trade payables	262,368	262,368	262,368	-	-
Other payables	-	-	-	-	-
Accruals	227,259	227,259	227,259	-	-
Share warrant provision	-	-	-	-	-
Decommissioning provision	128,871	128,871	-	128,871	-
	<u>618,498</u>	<u>618,498</u>	<u>489,627</u>	<u>128,871</u>	<u>-</u>

Notes to the Financial Statements (continued)
For the year ended 31 December 2023

22. Financial instruments and financial risk management (continued)

b) Liquidity risk (continued)

31 December 2022	Carrying amount €	Contractual cashflows €	0-6 months €	6-12 months €	1-2 years €
Trade payables	45,716	45,716	45,716	-	-
Other payables	-	-	-	-	-
Accruals	146,778	146,778	146,778	-	-
Share warrant provision	-	-	-	-	-
Decommissioning provision	131,421	131,421	-	131,421	-
	<u>323,915</u>	<u>323,915</u>	<u>192,494</u>	<u>131,421</u>	<u>-</u>

c) Market risk

Market risk is the risk that changes in market prices and indices will affect the Group's income or the value of its holdings of financial instruments. The Group has two principal types of market risk being foreign currency exchange rates and interest rates.

The Group's operates in an industry with financial risks arising from changes in commodity prices. At present the Group does not have revenue-generating operations but the Directors keep the requirement for hedging instruments under review. During the year, the Group did not enter into any hedging transactions.

Foreign currency risk

The Group presentational and functional currency is the Euro. The Group conducts and manages its business in Euro, US Dollars and GB Pounds in accordance with liabilities of the parent company and subsidiary undertakings. The Group therefore routinely purchases on the spot market the currencies of the countries in which it operates. From time to time certain transactions are undertaken denominated in other currencies. The risk is managed wherever possible by holding currency in Euro, US Dollars and GB Pounds. During the years ended 31 December 2023 and 31 December 2022, the Group did not utilise derivatives to manage foreign currency risk. The Group also recognises translation risk on consolidation as a foreign currency risk.

The Group's exposure to transactional foreign currency risk, for amounts included in cash and cash equivalents and trade and other payables (as shown on the balance sheet), is as follows:

	GB Pounds 2023 €	US Dollars 2023 €	Euro 2022 €	GB Pounds 2022 €	US Dollars 2022 €	Euro 2022 €
Cash and cash equivalents	42,660	18,182	-	69,150	25,683	-
Trade and other payables	-	-	-	(4,422)	-	-
	<u>42,660</u>	<u>18,182</u>	<u>-</u>	<u>64,728</u>	<u>25,683</u>	<u>-</u>

Notes to the Financial Statements (continued)
For the year ended 31 December 2023

22. Financial instruments and financial risk management (continued)

Foreign currency risk (continued)

Sensitivity analysis

A 10% strengthening or weakening in the value of sterling and the euro against the US dollar, based on the outstanding financial assets and liabilities at 31 December 2023 (2022: 10%), would have the following impact on the income statement. This analysis assumes that all other variables, in particular interest rates, remain constant.

	10% increase 2023 €	10% decrease 2023 €	10% increase 2022 €	10% decrease 2022 €
Cash and cash equivalents	6,084	(6,084)	9,483	(9,483)
Trade and other creditors	-	-	(888)	888
	6,084	(6,084)	8,595	(8,595)
Tax impact	-	-	-	-
After tax	6,084	(6,084)	8,595	(8,595)

Interest rate risk

The Group's exposure to the risk of changes in market interest rates relates primarily to the Group and Company's holdings of cash and short-term deposits. It is the Group and Company's policy as part of its management of the budgetary process to place surplus funds on short term deposit from time to time where interest is earned. The Group did not have any bank loan facilities at 31 December 2023 or 31 December 2022.

The interest rate profile of the Group's interest-bearing financial instruments at 31 December 2023 was as follows:

	Fixed rate 2023 €	Floating rate 2023 €	Total 2023 €	Fixed rate 2022 €	Floating rate 2022 €	Total 2022 €
Cash and cash equivalents	-	58,181	58,181	-	47,611	47,611
Tax impact	-	-	-	-	-	-
	-	58,181	58,181	-	47,611	47,611

Cash flow sensitivity analysis

The Company's approach to the management of financial risk is as set out under the Group disclosures above. The accounting classification for each class of the Company's financial assets and financial liabilities, together with their fair values, is as follows:

Notes to the Financial Statements (continued)
For the year ended 31 December 2023

22. Financial instruments and financial risk management (continued)

Interest rate risk (continued)

An increase of 500 basis points (2022: 500 basis points) or decrease of 500 basis points (2022: 500 basis point) in interest rates at the reporting date would have had the following effect on the income statement. This analysis assumes all other variables, in particular foreign currency, remain constant.

	500 bps increase 2023 €	500 bps decrease 2023 €	500 bps increase 2022 €	500 bps decrease 2022 €
Cash and cash equivalents	291	(291)	238	(238)
Tax impact	-	-	-	-
After tax	291	(291)	238	(238)

The Group has no interest bearing loans outstanding at 31 December 2023 and 31 December 2022. As there are no variable rate loans, there is no potential impact to profit and loss from a change in interest rates.

Company

A. Accounting classifications and fair values

The Company's approach to the management of financial risk is as set out under the Group disclosures above.

The accounting classification for each class of the Company's financial assets and financial liabilities, together with their fair values, is as follows:

Notes to the Financial Statements (continued)
For the year ended 31 December 2023

22. Financial instruments and financial risk management (continued)

31 December 2023	FVTPL €	Financial assets at amortised cost €	Other financial liabilities €	Carrying amount total €	Level 2 Fair value €	Level 3 Fair value €
Financial assets measured at fair value						
Amounts owed by subsidiary undertakings	5,943,025	-	-	5,943,025	-	5,943,025
Financial assets not measured at fair value						
Cash and cash equivalents	-	61,769	-	61,769	61,769	-
Financial liabilities measured at fair value						
Share warrants	-	-	-	-	-	-
Financial liabilities not measured at fair value						
Trade and other payables	-	-	(55,027)	(55,027)	(55,027)	-
31 December 2022	FVTPL €	Financial assets at amortised cost €	Other financial liabilities €	Carrying amount total €	Level 2 Fair value €	Level 3 Fair value €
Financial assets measured at fair value						
Amounts owed by subsidiary undertakings	6,492,043	-	-	6,492,043	-	6,492,043
Financial assets not measured at fair value						
Cash and cash equivalents	-	96,234	-	96,234	96,234	-
Financial liabilities measured at fair value						
Share warrants	-	-	-	-	-	-
Financial liabilities not measured at fair value						
Trade and other payables	-	-	(108,198)	(108,198)	(108,198)	-

The Company does not recognise any Level 1 fair value financial assets or liabilities.

Notes to the Financial Statements (continued)
For the year ended 31 December 2023

22. Financial instruments and financial risk management (continued)

Measurement of fair values

The Company's basis for the measurement of fair values is as set out under the Group disclosures above.

Amounts due from subsidiary companies

The amounts due from subsidiary undertakings are technically repayable on demand and so the carrying value is deemed to reflect fair value. The estimation of other fair values is the same, where appropriate, as for the Group as set out in above.

Risk exposures

The Company's operations expose it to the risks as set out for the Group above.

This note presents information about the Company's exposure to credit risk, liquidity risk and market risk, the Company's objectives, policies and processes for measuring and managing risk. Unless stated, the policy and process for measuring risk in the Company is the same as outlined for the Group above.

Credit risk

The carrying value of financial assets, net of impairment provisions, represents the Company's maximum exposure at the balance sheet date. The maximum credit exposure to credit risk is:

	Company 2023	Company 2022
	€	€
Amounts due from subsidiary undertakings	5,943,025	6,492,043
Trade and other debtors	13,052	35,049
Cash and cash equivalents	61,769	96,234
	<u>6,017,846</u>	<u>6,623,326</u>

At the balance sheet date, there was deemed to be a reduction in credit risk related to the loans due from subsidiary undertakings. The loans are expected to be recovered from future revenues generated by the Group's assets in Nevada, USA. A lifetime expected credit loss was calculated and a partial impairment provision of €1,468,970 has been made against the carrying value of the loans due from subsidiary undertakings (2022: €1,607,700) (see note 12). The expected credit loss calculation involved considering the maximum amount exposed to default, the potential loss arising on default and the probability of default in the judgement of the Directors.

The Directors are satisfied that no further impairment is considered to have occurred.

**Notes to the Financial Statements (continued),
For the year ended 31 December 2023**

22. Financial instruments and financial risk management (continued)

Liquidity risk

The liquidity risk for the Company is similar to that for the Group as set out above.

The following are the contractual maturities of the financial liabilities including estimated interest payments and excluding the impact of netting agreements:

31 December 2023	Carrying amount	Contractual cashflows	0-6 months	6-12 months	1-2 years
	€	€	€	€	€
Trade payables	1,929	1,929	1,929	-	-
Accruals	49,423	49,423	49,423	-	-
Share warrant provision	-	-	-	-	-
	51,352	51,352	51,352	-	-

31 December 2022	Carrying amount	Contractual cashflows	0-6 months	6-12 months	1-2 years
	€	€	€	€	€
Trade payables	11,923	11,923	11,923	-	-
Accruals	92,511	92,511	92,511	-	-
Share warrant provision	-	-	-	-	-
	104,434	104,434	104,434	-	-

Market risk

The market risk for the Company is similar to that for the Group as set out above. The Company's exposure to transactional foreign currency risk, including the associated sensitivities, is the same as the Group's as set out above.

23. Post balance sheet events

On 11 March 2024, the Company announced a Placing Agreement for the issue of 1,610,344,827 new Ordinary Shares of €0.0001 each at a price of 0.0435 pence each, raising £700,500 (€819,826) before transaction expenses and completed on 19 March 2024.

On 16 April 2024, the Company exercised an option to acquire the Olympic Gold Project.

There were no other significant post balance sheet events.

24. Approval of financial statements

The financial statements were approved by the Board on 8 May 2024.
