- Strong cash position following post-period end share placing plus exercise of 2019 warrants

#### **Operational Highlights:**

- Acquired option to purchase the Olympic Gold Project in Nevada
- Progressed exploitation of precious metals at Mineral Jackpot and RH Group
- Laboratory sampling indicated doubling of footprint for gold and silver mineralisation at Mineral Jackpot
- Grab sample from Mineral Jackpot yielded an assay of 27.4 g/t Au, 151 g/t Ag and 0.14% Cu
- Soil sampling at RH identified prospective zones of mineralisation

#### **Post period End:**

- Completed RH Group trenching programme, samples being processed
- First ever gold produced by the Company
- Fully funded to complete 2020 work programme and beyond
- Work commenced on Olympic Gold Project where surface sampling assays up to 21.50 ppm Au and 37.30 ppm Ag in surface dumps and stope material confirm precious metal enrichment potential
- Tests in progress on spoil material at Mineral Jackpot in preparation for leaching

### Executive Chairman's Report For the six months to 30 June 2020

Below are the unaudited half-year financial results of Great Western Mining Corporation PLC, covering the period ended 30 June 2020. Great Western is an exploration and development company which is not yet generating revenues and the net loss for the period was €487,441 (30 June 2019: €425,723: 31 December 2019 €815,795). After adjusting for non-cash share-based payment charges of €117,020 (30 June 2019: €89,517), administrative expenses have remained in line with the comparative period. The Company has successfully modified its work procedures during the COVID-19 Pandemic to ensure continuity of operations while the fund raisings it has undertaken, during the reporting period and since the period end, place it in a strong position to complete the current work programme and beyond.

During the period and since the period end, Great Western has made considerable progress on its mineral projects in the US state of Nevada where it has been concentrating on precious metals – gold and silver. Early in the year the Company was able to report successful readings of precious metals from soil sampling surveys on both the Mineral Jackpot Group and the Rock House Group ('RH').

Mineral Jackpot is in the Black Mountain group of claims and includes the old Mineral Jackpot Mine itself, together with the Bass Mine, Silver Moon Mine, Silver Bell Mine and Cabin Rock Mine. These mines have all successfully produced gold and silver in the past but have long since been abandoned. Great Western is using modern technology to achieve secondary recovery and to prove up communication between the individual mines which will increase the mineralisation footprint.

The RH Group has never previously been mined and potential mineralisation was identified through satellite imagery, followed up by rock sampling and then by soil sampling. A trenching programme has been conducted since the period end and analysis is in progress. The purpose of trenching is to establish a continuous vein which will subsequently be drilled. During summer 2020 a single small sample of rock was crushed and tested, resulting in the production of a high grade gold button, being the first gold ever produced by the Company and an indication of the potential.

In May, the Company acquired an option to purchase the Olympic Gold Project ('Olympic'), located approximately 50 miles from Great Western's original concessions. The purchase consideration of \$150,000 is spread over four years during which time Great Western has full rights to all data and to conduct exploration and appraisal work. Great Western may bring forward the closing of the purchase by early-paying the schedule in full or may exit the project at any time without penalty and without completing the payment schedule. Work is in progress on several potential prospects over this 800 acre site.

During the period the Company conducted two placings of new shares for cash. Since the period end the Company has benefited from a third placing and the exercise of 250 million warrants by warrant holders. In aggregate the net proceeds amount to approximately £1.33 million which is expected to enable the completion of the current work programme. It is Great Western's objective to produce first gold and silver in 2020 although no certainty of achieving this can be guaranteed, as the Company is dependent on third party contractors and facilities.

As with every other business, Great Western has inevitably been affected by the Pandemic this year and travel between Europe and the United States has not been possible since the working weather season began in the spring. However, the Company has managed to form a close working cooperation between its personnel in Ireland and the UK and local contractors in Nevada which has worked well in the circumstances.

Earlier this month Great Western published a new Company Presentation on its site (<a href="www.greatwesternmining.com">www.greatwesternmining.com</a>) which provides an up to date picture of its activities. The Company has provided guidance on the amount of gold ("Target Gold") it is seeking to identify on its assets, with Target Gold ranging from 500,000 ounces to 1,500,000 ounces. As well as the Target Gold, Great Western has an independent inferred copper resource of 4.3 million tonnes of 0.45% copper for 19 thousand tonnes of contained copper metal at a 0.2% cut-off grade on the M2 Copper Project on the Black Mountain Group of claims.

The support of Great Western's shareholders is much appreciated and the Company will continue to publish updates on a regular basis.

#### 1. General information

Great Western Mining Corporation PLC ("the Company") is a company domiciled in the Republic of Ireland. The Half Yearly Report and Unaudited Condensed Consolidated Financial Statements ('the half yearly financial statements') of the Company for the six months ended 30 June 2020 comprise the results and financial position of company and its subsidiaries ("the Group").

The Group half yearly financial statements were authorised for issue by the Board of Directors on 28 September 2020.

#### **Basis of preparation**

The half yearly financial statements for the six months ended 30 June 2020 are unaudited. The financial information presented herein does not amount to statutory financial statements that are required by Chapter 4 part 6 of the Companies Act 2014 to be annexed to the annual return of the company. The statutory financial statements for the financial year ended 31 December 2019 were annexed to the annual return and filed with the Registrar of Companies. The audit report on those financial statements was unqualified.

The Group half yearly financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as adopted by the European Union ("EU").

The financial information contained in the half yearly financial statements have been prepared on the historical cost basis, except for the share-based payments and warrants, which are based on fair values determined at the grant date. The accounting policies have been applied consistently in accordance with the accounting policies set out in the annual report and financial statements for the year ended 31 December 2019 except as outlined below.

#### **Accounting policies**

The accounting policies adopted are consistent with those of the annual Financial Statements for the year ended 31 December 2019. New and amended standards that became applicable for the Group in the current reporting period have not resulted in changes to accounting policies or retrospective adjustments.

#### Use of estimates and judgements

The preparation of half-yearly financial statements in conformity with IFRS requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making judgements about carrying values of assets and liabilities that are not readily apparent from other sources.

In particular, significant areas of estimation uncertainty in applying accounting policies that have the most significant effect on the amount recognised in the financial statements are in the following area:

• Note 13 – Share based payments and share warrant valuations

In particular, significant areas of critical judgements in applying accounting policies that have the most significant effect on the amount recognised in the financial statements are in the following areas:

- Note 7 Property, plant and equipment; consideration of impairment.
- Note 8 Intangible asset; consideration of impairment.

#### 2. Going concern

The financial statements of the Group are prepared on a going concern basis.

The Directors have given careful consideration to the Group's ability to continue as a going concern through review of cash flow forecasts prepared by management for the period to 31 December 2021, review of the key assumptions on which these are based and sensitivity analysis.

The future of the Company is dependent on the successful outcome of its exploration activities. The Directors believe that the Group's ability to make planned capital expenditure on its claims in Nevada and to fund its ongoing operational expenditure could be assisted if it became necessary by the deferral of planned expenditure or by raising additional capital.

The Directors have also considered the continuing impact of Covid-19 on the Company. The Company has adapted its capital work programme for 2020 and contracted local service providers to overcome current travel restrictions. In the 2019 Annual Report the Directors also highlighted the potential risk of volatile capital markets impacting the Company's ability to raise new equity funds. The Directors have taken into consideration the completion of a placing in May 2020 during the period under review as well as a further placing in July 2020 and the exercise of warrants in September 2020. While confident of being able to achieve the Company's objectives, the Directors have concluded that the full impact of Covid-19 on the Group's operations and financial performance cannot yet be determined and will need to be kept under review over the coming months.

The Directors concluded that the Group will have sufficient resources to continue as a going concern for the future, that is for a period of not less than 12 months from the date of approval of the unaudited condensed consolidated financial statements. However, there exists a material uncertainty that may cast significant doubt over the ability of the Group to continue as a going concern while the impact of Covid-19 cannot be fully assessed. The impact of Covid-19 may result in the Group being unable to realise its assets and discharge its liabilities in the normal course of business or being able to raise funds to explore further its exploration assets. The unaudited condensed consolidated statements have been prepared on a going concern basis and do not include any adjustments that would be necessary if this basis were inappropriate.

#### 3. Segment information

The Group has one principal reportable segment, Nevada, USA, which represents the exploration for and development of copper, silver, gold and other minerals in Nevada, USA.

Other operations are disclosed under "Corporate Activities" which includes cash resources held by the Group and other operational expenditure incurred by the Group. These assets and activities are not within the definition of an operating segment.

In the opinion of the Directors the operations of the Group comprise one class of business, being the exploration and development of copper, silver, gold and other minerals. The Group's main operations are located within Nevada, USA. The information reported to the Group's chief executive officer, who is the chief operating decision maker, for the purposes of resource allocation and assessment of segmental performance is particularly focussed on the exploration activity in Nevada.

It is the opinion of the Directors, therefore, that the Group has only one reportable segment under IFRS 8 'Operating Segments', which is exploration carried out in Nevada. Other operations "Corporate Activities" includes cash resources held by the Group and other operational expenditure incurred by the Group. These assets and activities are not within the definition of an operating segment.

Information regarding the Group's results, assets and liabilities is presented below.

The Directors have reviewed the carrying value of the exploration and evaluation assets. These assets are carried at historical cost and have been assessed for impairment in particular with regards to the requirements of IFRS 6 'Exploration for and Evaluation of Mineral Resources' relating to remaining licence or claim terms, likelihood of renewal, likelihood of further expenditures, possible discontinuation of activities over specific claims and available data which may suggest that the recoverable value of an exploration and evaluation asset is less than carrying amount. The Directors are satisfied that no impairment is required as at 30 June 2020. The realisation of the intangible assets is dependent on the successful identification and exploitation of copper, silver, gold and other mineral in the Group's licence area. This is dependent on several variables including the existence of commercial mineral deposits, availability of finance and mineral prices.
